Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 and 57 Broad Street, - - BOSTON, MASS.

DURHAM DRAINAGE FITTINGS

Fig. A.

Are made with an interior shoulder (as in Fig. A) securing flush inner surface. Ordinary steam fittings have an interior depression (as in Fig. B) and are not suitable for drainage purposes.

"The American Architect Scholarship."

THE

TRAVELLING-SCHOLARSHIP

ESTABLISHED BY THE

American Architect and Building News

IS open only to subscribers to the Imperial Edition of that journal (without distinction of sex or color) who may dwell in any part of the United States, under the following general conditions:

1. The applicant must be a citizen of the United States.
2. Subscription to the Imperial Edition must be prepaid *in full* direct to the publishers.
3. At the time of filing notice of intention to compete, the applicant must be between the ages of twenty and twenty-five years. It is desirable that notice should be filed with the editors before May 15, 1889.
4. The applicant must have served for at least two years in offices of members of the American Institute of Architects, or of the Western Association of Architects. A graduate's diploma granted by a technical school will be accepted in lieu of one of these years' of office-work.
5. Applicants must undergo examination in:
   - *a.* Drawing — free-hand and mechanical.
   - *b.* Architectural Design.
   - *c.* Elements of Construction.
   - *d.* History of Architecture.
   - *e.* English Composition.
   - *f.* One Foreign Language.
   - *g.* Elements of Sanitation, Heating and Ventilating.

   The exact date and place of examination will be announced later.
6. An examination fee of $5.00 for the benefit of the examiners will be required.
7. The appointee must take his departure within six weeks of receiving notice of appointment. One hundred dollars will be paid to him at the time of taking ocean passage and the balance of the scholarship in monthly instalments of $33.33.
8. The course of travel and study while abroad will be outlined by the editors of the *American Architect.*

December 22, 1888.

TO ARCHITECTS AND CONTRACTORS:

We desire to call your attention to the Superior quality of **Plate Glass manufactured by the**

PITTSBURGH PLATE GLASS CO.

The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.

The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed,** besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.

We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.

With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

NOTICE!

We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.

We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.

WILL YOUR WINTER BE AS PLEASANT

as the summer you have so much enjoyed?

The Novelty Furnace

will fill your house with the same warm pleasant balmy atmosphere that has made the past season delightful.

Absolutely free from gas.

No dust in the hot-air pipes.

Servants run them successfully.

Moderate in cost. Moderate in consumption.
Peculiar construction. Great durability.

IMMENSE HEATING POWER.

The large heating-surface exposed by the peculiar arrangement, enables it to constantly afford a large volume of healthfully warmed fresh air which is perfect ventilation.

The manner in which the gases are retained and the indirect passage they are forced to make extracts their principal heat endowing the furnace with

EXTRAORDINARY ECONOMICAL QUALITIES.

Send for descriptive pamphlet.

Correspondence carefully attended.

(Established 1852.)

Fulton St., cor. William, New York.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

THE BRONSON BOILER
For Steam and Hot-Water Heating.
Automatic and Reliable.

With BRICK or IRON Settings, as you may prefer, The Bronson is constructed on scientific principles the fire surface being of the best boiler tubing that can be obtained. This boiler exposes more water to the direct action of the fire, either in steam or hot-water heating, than any boiler made. ☞ We are making a specialty of a High Grade all-steel Boiler, which we are anxious to place by the side of anything in the world for actual results. Reliable Agents Wanted. Send for Illustrated Catalogue and Price List.

THE NATIONAL AUTOMATIC GAS GOVERNOR.

33 Per Cent
SAVING IN
GAS BILLS
GUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted *pro rata*. The higher the pressure, the less the illumination and the larger the gas bill.

The automatic action of Governor, attached to each individual meter, permits the consumer to control his own pressure regardless of the Gas Company, and obligates him to pay for only the minimum supply of Gas required for economic service.

Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere.

Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings, or drapery.

Greatly reduces "Fire Insurance Risks" incident to "Streaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes.

Special discounts to Architects.

The Union National Gas Saving Co.,

WARREN'S "COMPOSITE" FELT,

For Roof Foundations.

A two-ply, composed of one layer of saturated Felt and one of manilla-rope paper with a layer of cement between. Combines durability and strength with lightness and pliability, and is *absolutely* impervious to moisture. *For use under slate, shingles,* etc., it is especially valuable, since as soon as the sun comes upon the roof, the cement contained in the sheething closes tightly around the nails that have been driven through it, and form of the sheathing itself a complete waterproof covering. It is four and one-half times stronger than ordinary roofing.

Send for Samples and Circular No. 12.

THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

H. W. JOHNS' ASBESTOS LIQUID PAINTS

These Paints are in every respect strictly first-class, being composed of the best and purest materials obtainable. They have a larger sale than any other paints made in this country or abroad, and, although they cost a trifle more per gallon, they will do more and better work for the same amount of money, owing to their wonderful covering properties, while their superior durability renders them the most economical paints in the world. Sample Sheets and Descriptive Price List free by mail.

☞ We are pleased to answer inquiries from all who contemplate painting their houses: to make suggestions regarding colors to be used, and give estimate of quantity and cost of Paints necessary. Correspondents will please give particulars regarding size, style, situation and surroundings of their buildings, and send photograph when possible.

[*Continued on page* xvi.]

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

UNDER the title "*A Tin Roof*," Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph*, February 16, 1889.

MESSRS. MERCHANT & CO., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof*." Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record*, Baltimore, of February 9, 1889.

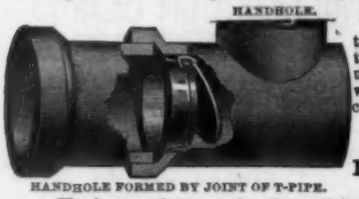
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an Iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."
THE COLUMBUS WROUGHT STEEL KITCHEN AND PANTRY
Displaces all others wherever introduced — SINKS — Painted, Galvanized, Enameled
Send for Descriptive Circular and Price List
THE KILBOURNE & JACOBS MFG. CO. 316 Mc... COLUMBUS, O.

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

[redacted] "DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes INSIDE WORK, Requiring extreme durability, use No. 2 ELASTICA FINISH.

For OUTSIDE WORK, Requiring extreme durability, use No. 1 ELASTICA FINISH

"The American Architect Scholarship."

THE

TRAVELLING-SCHOLARSHIP

ESTABLISHED BY THE

American Architect and Building News

IS open only to subscribers to the Imperial Edition of that journal (without distinction of sex or color) who may dwell in any part of the United States, under the following general conditions:

1. The applicant must be a citizen of the United States.
2. Subscription to the Imperial Edition must be prepaid *in full* direct to the publishers.
3. At the time of filing notice of intention to compete, the applicant must be between the ages of twenty and twenty-five years. It is desirable that notice should be filed with the editors before May 15, 1889.
4. The applicant must have served for at least two years in offices of members of the American Institute of Architects, or of the Western Association of Architects. A graduate's diploma granted by a technical school will be accepted in lieu of one of these years' of office-work.
5. Applicants must undergo examination in:
   - *a.* Drawing — free-hand and mechanical.
   - *b.* Architectural Design.
   - *c.* Elements of Construction.
   - *d.* History of Architecture.
   - *e.* English Composition.
   - *f.* One Foreign Language.
   - *g.* Elements of Sanitation, Heating and Ventilating.

   The exact date and place of examination will be announced later.
6. An examination fee of $5.00 for the benefit of the examiners will be required.
7. The appointee must take his departure within six weeks of receiving notice of appointment. One hundred dollars will be paid to him at the time of taking ocean passage and the balance of the scholarship in monthly instalments of $33.33.
8. The course of travel and study while abroad will be outlined by the editors of the *American Architect.*

December 22, 1888.

E. VAN NOORDEN & CO.,
383 Harrison Ave., BOSTON, Mass.

INVALUABLE TO ARCHITECTS.

SAFE BUILDING.

BY LOUIS De COPPET BERG.

Series I. Square 8vo. Illustrated with numerous formulæ, diagrams and tables. Price, $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor-of-safety, centre of gravity, neutral axis, moment of inertia, etc. There follows a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses, spires, masonry, girders, inverted and floor-arches, sidewalks, stairs, chimneys, etc."

These papers are the work of a practising architect, and not of a mere book-maker or theorist. Mr. Berg, aiming to make his work of the greatest value to the largest number, has confined himself in his mathematical demonstrations to the use of arithmetic, algebra, and plane geometry. In short these papers are in the highest sense practical and valuable.

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

PIPE-COVERING.

ASBESTOS

This covering is made entirely of Asbestos, and can not be affected injuriously by heat or dampness, nor can it be made a harbor for vermin.

Asbestos Building-Felt, Fire-Proof Cements, &c.

Chairs made from Architects' designs Catalogues and Estimates Cheerfully furnished.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Home Sanitation,

A Manual for Housekeepers, by the Sanitary Science Club of the Association of Collegiate Alumnæ. Edited by Ellen H. Richards and Marion Talbot. Cloth. . . . . 50 cents.

THE object of this manual is to arouse the interest of housekeepers in the sanitary condition of their homes, and to indicate the points requiring investigation, the methods of examination, and the practical remedies. The subjects treated are the Situation of the House, care of the Cellar, Plumbing and Drainage, Ventilation, Heating, Lighting, Furnishing, Clothing, Food, and Drink. Each topic is introduced by an explanatory statement, which is followed by a series of questions so framed that an affirmative answer implies a satisfactory arrangement; and they also suggest a remedy if the answer is negative.

TICKNOR & CO., PUBLISHERS, 211 TREMONT ST., BOSTON.

The exterior of this house is stained with
CABOT'S CREOSOTE STAIN
for Shingles, Fences, Clapboards Etc

These Stains are very durable and give a much more artistic effect than paint, while they are cheaper, and very easy to apply:

Our Stains contain no water and are the only exterior Stains that do not contain kerosene: . . .

PRICES are 40, 60 and 75 cents per Gallon According to Color.
SEND for Samples on Wood, and Circulars.

THE NATIONAL AUTOMATIC GAS GOVERNOR.

33 Per Cent SAVING IN GAS BILLS GUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted *pro rata*. The higher the pressure, the less the illumination and the larger the gas bill.

The automatic action of Governor, attached to each individual meter, permits the consumer to control his own pressure regardless of the Gas Company, and obligates him to pay for only the minimum supply of Gas required for economic service.

Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere.

Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings, or drapery.

Greatly reduces "Fire Insurance Risks" incident to "Streaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes.

Special discounts to Architects.

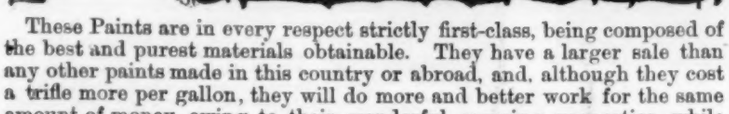
H. W. JOHNS' ASBESTOS LIQUID PAINTS



These Paints are in every respect strictly first-class, being composed of the best and purest materials obtainable. They have a larger sale than any other paints made in this country or abroad, and, although they cost a trifle more per gallon, they will do more and better work for the same amount of money, owing to their wonderful covering properties, while their superior durability renders them the most economical paints in the world. Sample Sheets and Descriptive Price List free by mail.

☞ We are pleased to answer inquiries from all who contemplate painting their houses: to make suggestions regarding colors to be used, and give estimate of quantity and cost of Paints necessary. Correspondents will please give particulars regarding size, style, situation and surroundings of their buildings, and send photograph when possible.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

UNDER the title "*A Tin Roof*," Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph*, February 16, 1889.

MESSRS. MERCHANT & CO., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof*." Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record*, Baltimore, of February 9, 1889.

PROPOSALS.

LUMBER AND ACID.
[At Washington, D. C.]
WASHINGTON, D. C., March 22, 1889.

Sealed proposals endorsed "Proposals for Lumber" or "Acid," will be received at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., **until 11 o'clock** A. M., **April 13, 1889,** and publicly opened immediately thereafter, to furnish and deliver at Brooklyn Navy Yard, 35,000 feet of W. P. lumber; at the Norfolk Navy Yard, 150 carboys muriatic acid.

The articles must conform to the prescribed standard and pass the usual naval inspection.

Tie bids decided by lot.

Blank proposals containing specifications, etc., can be obtained on application to the Bureau, or to the general storekeeper at the Navy Yard where the articles are to be delivered.

The Department reserves the right to reject any proposal not deemed advantageous to the Government.

JAMES FULTON,
694 Paymaster-General, U. S. Navy.

CEMENT, BRICKS, LUMBER, ETC.
[At Washington, D. C.]
OFFICE OF BUILDING FOR LIBRARY OF CONGRESS, 145 EAST CAPITOL STREET,
WASHINGTON, D. C., March 18, 1889.

Separate sealed proposals will be received at this office **until 2** P. M., **on Thursday, the 4th day of April, 1889,** and opened immediately thereafter in presence of bidders, for furnishing and delivering at the site of the Building for Library of Congress, in this city. 1. 5,000 barrels natural hydraulic cement. 2. 2,000,000 best red and hard-burned bricks. 3. 3,000 cubic yards river sand. 4. 5,500 cubic yards, more or less of broken stone. 5. 37,000 feet of lumber. 6. Supplies of miscellaneous hardware.

Specifications, general instructions and conditions and blank forms of proposal may be obtained on application to this office.

BERNARD R. GREEN,
692 Superintendent and Engineer.

WATER-PIPE, ETC.
[At Washington, D. C.]
OFFICE OF WASHINGTON AQUEDUCT,
WASHINGTON, D. C., March 20, 1889.

Sealed proposals, in duplicate, will be received at this office **until noon Wednesday, April 10, 1889,** for furnishing and delivering in the city of Washington 22,700 lineal feet, more or less, of 48-inch cast-iron water-pipe and such special castings as may be required for increasing the water-supply of the city.

Forms and specifications can be obtained at this office.

The United States reserves the right to reject any and all proposals.

The attention of bidders is invited to the Acts of Congress approved February 26, 1885, and February 23, 1887, Vol. 23, page 332, and Vol. 24, page 414, Statutes at Large.

JOHN M. WILSON,
693 Colonel, U. S. A.

LAYING WATER-PIPE.
[At New London, Conn.]
OFFICE BOARD WATER COMMISSIONERS,
NEW LONDON, CONN., March 8, 1889.

Sealed proposals, indorsed as above, will be received at this office **until 11 o'clock** A. M., **April 17, 1889,** for carting and laying about five miles of 20-inch pipe and connections.

Plans may be seen and specifications obtained at the Engineer of the Water Department.

B. A. ARMSTRONG,
E. T. BROWN,
P. C. DUNFORD,
GEORGE WILLIAMS,
Board of Water Commissioners.
W. H. RICHARDS, Engineer.
694

BREAKWATER.
[At Mouth of Housatonic River, Conn.]
ENGINEER OFFICE U. S. ARMY, ROOM 57, ARMY BUILDING, COR. HOUSTON AND GREENE STS.
NEW YORK, N. Y., March 22, 1889.

Sealed proposals, in triplicate, for construction of a breakwater at the mouth of the Housatonic River, Conn., will be received at this office **until twelve (12) o'clock, noon, on Monday, April 22, 1889.**

The attention of bidders is invited to the Acts of Congress approved February 26, 1885, and February 23, 1887, Vol. 23, page 332, and Vol. 24, page 414, Statutes at Large.

Further information can be obtained at this office.

D. C. HOUSTON,
694 Lieut.-Colonel of Engineers.

PROPOSALS FOR CEMENT. Office of Building for Library of Congress, 145 East Capitol Street, Washington, D. C., March 18, 1889. M., on Thursday, the fourth day of April, 1889, and opened immediately thereafter in presence of bidders. Specifications, general instructions and conditions, and blank forms of proposal, may be obtained on application at this office. BERNARD R. GREEN, Superintendent and Engineer. 692

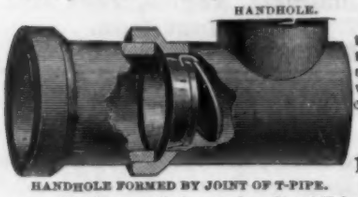
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on appacation.

For Sale by all Dealers in Plumbers' Supplies

We also manufacture an iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."
THE COLUMBUS WROUGHT STEEL KITCHEN AND PANTRY
Displaces all others wherever introduced — SINKS — Painted, Galvanized, Enameled
Send for Descriptive Circular and Prices to

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.
FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.
H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 and 57 Broad Street, - - BOSTON, MASS.

TO ARCHITECTS AND CONTRACTORS:

We desire to call your attention to the Superior quality of **Plate Glass manufactured by the**

PITTSBURGH PLATE GLASS CO.

The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.

The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed,** besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.

We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.

With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

23 Court St.	76 Beekman St.	137 Lake St.	CLINTON, MASS.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.
HENRY R. WORTHINGTON.

Welded Chrome Steel and Iron. (5 ply).

WILL YOUR WINTER BE AS PLEASANT
as the summer you have so much enjoyed?

The Novelty Furnace

will fill your house with the same warm pleasant balmy atmosphere that has made the past season delightful.

Absolutely free from gas.
No dust in the hot-air pipes.
Servants run them successfully.

Moderate in cost. Moderate in consumption.
Peculiar construction. Great durability.

IMMENSE HEATING POWER.

The large heating-surface exposed by the peculiar arrangement, enables it to constantly afford a large volume of healthfully warmed fresh air which is perfect ventilation.

The manner in which the gases are retained and the indirect passage they are forced to make extracts their principal heat endowing the furnace with

EXTRAORDINARY ECONOMICAL QUALITIES.

Send for descriptive pamphlet.

Correspondence carefully attended.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

Under the title "*A Tin Roof*," Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph*, February 16, 1889.

Messrs. Merchant & Co., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof*." Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record*, Baltimore, of February 9, 1889.

PAGE STEAM HEATER

See last week's issue for particulars.

PAGE STEAM HEATING CO., NORWICH, CONN.

THE NATIONAL AUTOMATIC GAS GOVERNOR.

33 Per Cent SAVING IN GAS BILLS GUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted *pro rata*. The higher the pressure, the less the illumination and the larger the gas bill.

The automatic action of Governor, attached to each individual meter, permits the consumer to control his own pressure regardless of the Gas Company, and obligates him to pay for only the minimum supply of Gas required for economic service.

Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere.

Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings, or drapery.

Greatly reduces "Fire Insurance Risks" incident to "Streaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes.

Special discounts to Architects.

WARREN'S "COMPOSITE" FELT.

For Roof Foundations.

A two-ply, composed of one layer of saturated Felt and one of manilla-rope paper with a layer of cement between. Combines durability and strength with lightness and pliability, and is *absolutely* impervious to moisture. *For use under slate, shingles*, etc., it is especially valuable, since as soon as the sun comes upon the roof, the cement contained in the sheathing closes tightly around the nails that have been driven through it, and form of the sheathing itself a complete waterproof covering. It is four and one-half times stronger than ordinary roofing.

Send for Samples and Circular No. 12.

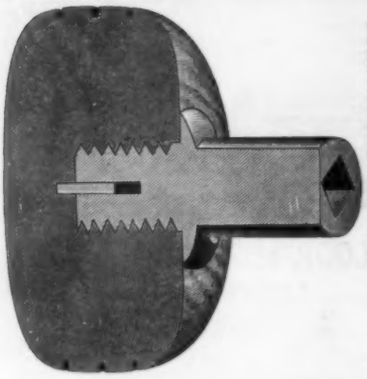
Patent Wood Door Knobs



Wood Knobs, if carefully made of selected and thoroughly dried material, of tasteful design, beautifully and durably finished and put together so that there is no possibility of the knobs coming loose from the shanks, make the best and most desirable knobs for interior doors; as they are pleasing to the eye, pleasant to the hand and are made to harmonize with the surrounding woodwork. We confidently offer the Knobs of this make as meeting all these requirements. We warrant every Knob not to come loose or give out in any way. The engraving represents our latest improved and patented method of fastening the shanks to the heads. Not a single Knob with this fastening has come loose. These are the only Wood Knobs in the market having a patented fastening, all others are merely screwed on, and are liable to come loose at any time. Architects are warned that certain dealers to save a few cents a dozen, have been substituting a very inferior imitation, where these goods have been specified; none should be accepted unless the makers' name is on the box. Price list on application.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

NEW YORK, N. Y., March 22, 1889.

Sealed proposals, in triplicate, for construction of a breakwater at the mouth of the Housatonic River, Conn., will be received at this office **until twelve (12) o'clock, noon, on Monday, April 22, 1889.**

The attention of bidders is invited to the Acts of Congress approved February 26, 1885, and February 23, 1887, Vol. 23, page 332, and Vol. 24, page 414, Statutes at Large.

Further information can be obtained at this office.

D. C. HOUSTON,
694 Lieut.-Colonel of Engineers.

Highland Park, Ill., March 30, 1889. Sealed proposals, in triplicate, will be received at this office until 10 o'clock A. M., Tuesday, April 30, 1889, and then opened for furnishing all material and labor, and erecting at Fort Sheridan, Ill., the following buildings, viz.: One barrack wing for six companies, one store-house, one guard-house, one quartermaster's stable, one double set of non-commissioned officers' quarters, two sets field officers' quarters, seven sets captains' quarters, fifteen sets lieutenants' quarters, one building for shops, one bakery and one coal-shed. Subject to an increase or decrease of twenty per cent in the number of lieutenants' quarters. The Government reserves the right to reject any or all bids, or parts thereof. Bidders are requested to state the time required to complete the work. All information furnished upon application to this office. Detailed plans and specifications can also be seen at the office of the undersigned in the Pullman Building, Chicago, Ill., and at the Depot Quartermaster's office, New York City. Envelopes containing proposals will be marked "Proposals for Buildings at Fort Sheridan, Ill.," and addressed to the undersigned. CROSBY P. MILLER,
A. Q. M., United States Army. 696

PROPOSALS FOR IRON BUOYS AND APPENDAGES, MOORING-CHAIN AND BELLS. Office of Light-House Inspector, Third District, Tompkinsville, N. Y., March 28, 1889 (Post-Office Box 2128, New York City). Proposals will be received at this office until 1 o'clock P. M. on Monday, the 15th day of April, 1889, for furnishing to the Light-House Establishment iron buoys and appendages, mooring-chain and bells. The articles to be furnished embrace nun, can, bell, whistling, gas and ice buoys, shackles, swivels, mooring-chain, ballast-balls, iron and stone sinkers, and bells for light-vessels, all of which are enumerated in the specifications attached to the form of bid, which may be obtained on application to this office. Contracts will be awarded on each item separately, and bidders are required to state the time when they will agree to deliver the articles. The right is reserved to reject any or all bids, to strike out any item or items in the specifications, and to waive any defects.
FREDERICK RODGERS, Commander, U. S. N.,
Light-House Inspector, Third District. 693

LUMBER AND ACID.
[At Washington, D. C.]
WASHINGTON, D. C., March 22, 1889.

Sealed proposals endorsed "Proposals for Lumber" or "Acid," will be received at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., **until 11 o'clock** A. M., **April 13, 1889,** and publicly opened immediately thereafter, to furnish and deliver at Brooklyn Navy Yard, 35,000 feet of W. P. lumber; at the Norfolk Navy Yard, 150 carboys muriatic acid.

The articles must conform to the prescribed standard and pass the usual naval inspection.

Tie bids decided by lot.

Blank proposals containing specifications, etc., can be obtained on application to the Bureau, or to the general storekeeper at the Navy Yard where the articles are to be delivered.

The Department reserves the right to reject any proposal not deemed advantageous to the Government.

JAMES FULTON,
694 Paymaster-General, U. S. Navy.

EXCAVATION.
[At Washington, D. C.]
OFFICE OF BUILDING FOR LIBRARY OF CONGRESS, 145 EAST CAPITAL STREET,
WASHINGTON, D. C., March 20, 1889.

Sealed proposals for excavating foundation trenches and removing the material, for the Building for the Library of Congress, in this city, will be received at this office **until 3 o'clock** P. M., **on Wednesday, the 10th day of April, 1889** and opened immediately thereafter in presence of bidders.

Specifications, general instructions and conditions and blank forms of proposal may be obtained on application at this office.

BERNARD R. GREEN,
693 Superintendent and Engineer.

WATER-PIPE, ETC.
[At Washington, D. C.]
OFFICE OF WASHINGTON AQUEDUCT,
WASHINGTON, D. C., March 20, 1889.

Sealed proposals, in duplicate, will be received at this office **until noon Wednesday, April 10, 1889,** for furnishing and delivering in the city of Washington 22,700 lineal feet, more or less, of 48-inch cast-iron water-pipe and such special castings as may be required for increasing the water-supply of the city.

Forms and specifications can be obtained at this office.

The United States reserves the right to reject any and all proposals.

The attention of bidders is invited to the Acts of Congress approved February 26, 1885, and February 23, 1887, Vol. 23, page 332, and Vol. 24, page 414, Statutes at Large.

JOHN M. WILSON,
693 Colonel, U. S. A.

LAYING WATER-PIPE.
[At New London, Conn.]
OFFICE BOARD WATER COMMISSIONERS,
NEW LONDON, CONN., March 8, 1889.

Sealed proposals, indorsed as above, will be received at this office **until 11 o'clock** A. M., **April 17, 1889,** for carting and laying about five miles of 20-inch pipe and connections.

Plans may be seen and specifications obtained at the Engineer of the Water Department.

B. A. ARMSTRONG,
E. T. BROWN,
P. C. DUNFORD,
GEORGE WILLIAMS,
Board of Water Commissioners.
W. H. RICHARDS, Engineer.

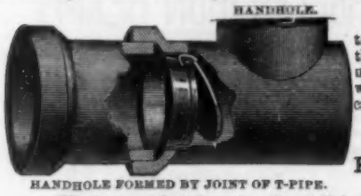
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HANDHOLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an Iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."
THE COLUMBUS WROUGHT STEEL KITCHEN AND PANTRY
Displaces all others when ever introduced — SINKS — Painted, Galvanized, Enameled

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 & 57 Broad St., BOSTON, MASS.

THE "COMFORT" BLIND FASTENER.

PATENT APPLIED FOR.

THE "Comfort" Blind Fastener, as illustrated in the above cut, is intended to simplify the opening and closing of blinds. By the use of this Fastener, the necessity of leaning out of window is dispensed with, which of itself is a very great advantage, especially in stormy weather.

There is, also, no possibility of the blinds being lifted from their hangings where the "Comfort" Fastener is used.

It can be readily attached to any blind at an expense very trifling when compared with the advantages it possesses.

IMPORTANT
To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

Both the Frames and Blades of our Star Hack Saws are now as perfect as human skill can make them. The Frame is steel, polished and Nickel plated, and will hold all blades from 8 to 12 inches, and face them in four directions. With the extra clamp, as seen in the cut, all broken blades can be used. These Saws have a file temper, and one five cent Blade will cut iron or soft steel steadily for several hours, doing more work than a dollar's worth of files.

Price of No. 6 Frame							$1 00

Conductor.

Guaranteed no Infringement.

This pipe has all the advantages of other corrugated conductors in not bursting from freezing, and in addition:

It has no soldered joints.

The enlarged coupling makes the conductor of even size inside throughout.

It is galvanized, after formation, great care being taken to secure a smooth coating of zinc free from dross and impurities.

MANUFACTURED BY

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

Make a specialty of SEATING FOR OPERA-HOUSES, CHURCHES, EDUCATIONAL INSTITUTES, etc.

Chairs made from Architects' designs Catalogues and Estimates Cheerfully furnished.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Send for Illustrated Price-List.

THE NATIONAL AUTOMATIC GAS GOVERNOR.

33 Per Cent SAVING IN GAS BILLS CUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted *pro rata*. The higher the pressure, the less the illumination and the larger the gas bill.

The automatic action of Governer, attached to each individual meter, permits the consumer to control his own pressure regardless of the Gas Company, and obligates him to pay for only the minimum supply of Gas required for economic service.

Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere.

Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings, or drapery.

Greatly reduces "Fire Insurance Risks" incident to "Streaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes.

Special discounts to Architects.

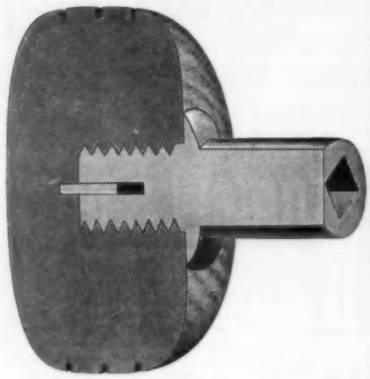
Patent Wood Door Knobs



Wood Knobs, if carefully made of selected and thoroughly dried material, of tasteful design, beautifully and durably finished and put together so that there is no possibility of the knobs coming loose from the shanks, make the best and most desirable knobs for interior doors; as they are pleasing to the eye, pleasant to the hand and are made to harmonize with the surrounding woodwork. We confidently offer the Knobs of this make as meeting all these requirements. We warrant every Knob not to come loose or give out in any way. The engraving represents our latest improved and patented method of fastening the shanks to the heads. Not a single Knob with this fastening has come loose. These are the only Wood Knobs in the market having a patented fastening, all others are merely screwed on, and are liable to come loose at any time. Architects are warned that certain dealers to save a few cents a dozen, have been substituting a very inferior imitation, where these goods have been specified; none should be accepted unless the makers' name is on the box. Price list on application.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

Under the title "*A Tin Roof*," Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph*, February 16, 1889.

Messrs. Merchant & Co., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof.*" Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record*, Baltimore, of February 9, 1889.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

PROPOSALS.

Highland Park, Ill., March 30, 1889. Sealed proposals, in triplicate, will be received at this office until 10 o'clock A. M., Tuesday, April 30, 1889, and then opened for furnishing all material and labor, and erecting at Fort Sheridan, Ill., the following buildings, viz.: One barrack wing for six companies, one store-house, one guard-house, one quartermaster's stable, one double set of non-commissioned officers' quarters, two sets field officers' quarters, seven sets captains' quarters, fifteen sets lieutenants' quarters, one building for shops, one bakery and one coal-shed. Subject to an increase or decrease of twenty per cent in the number of lieutenants' quarters. The Government reserves the right to reject any or all bids, or parts thereof. Bidders are requested to state the time required to complete the work. All information furnished upon application to this office. Detailed plans and specifications can also be seen at the office of the undersigned in the Pullman Building, Chicago, Ill., and at the Depot Quartermaster's office, New York City. Envelopes containing proposals will be marked "Proposals for Buildings at Fort Sheridan, Ill." and addressed to the undersigned. CROSBY P. MILLER, A. Q. M., United States Army. 696

LUMBER AND ACID.
[At Washington, D. C.]
WASHINGTON, D. C., March 22, 1889.

Sealed proposals endorsed "Proposals for Lumber" or "Acid," will be received at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., **until 11 o'clock** A. M., **April 13, 1889,** and publicly opened immediately thereafter, to furnish and deliver at Brooklyn Navy Yard, 35,000 feet of W. P. lumber; at the Norfolk Navy Yard, 150 carboys muriatic acid.

The articles must conform to the prescribed standard and pass the usual naval inspection.

Tie bids decided by lot.

Blank proposals containing specifications, etc., can be obtained on application to the Bureau, or to the general storekeeper at the Navy Yard where the articles are to be delivered.

The Department reserves the right to reject any proposal not deemed advantageous to the Government.

JAMES FULTON,
694 Paymaster-General, U. S. Navy.

LAYING WATER-PIPE.
[At New London, Conn.]
OFFICE BOARD WATER COMMISSIONERS,
NEW LONDON, CONN., March 8, 1889.

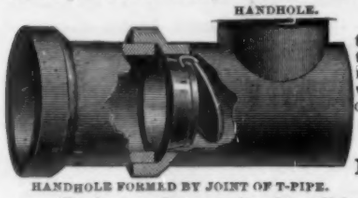
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HANDHOLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."
THE COLUMBUS WROUGHT STEEL KITCHEN AND PANTRY
Displaces all others wherever introduced — SINKS — Painted, Galvanized, Enameled

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 & 57 Broad St., BOSTON, MASS.

DURHAM
DRAINAGE FITTINGS

Are made with an interior shoulder (as in Fig. A) securing flush inner surface. Ordinary steam fittings have an interior depression (as in Fig. B) and are not suitable for drainage purposes.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

Under the title *"A Tin Roof,"* Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia. — *Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"A Tin Roof" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence. — *Philadelphia Telegraph*, February 16, 1889.

Messrs. Merchant & Co., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be *"A Tin Roof."* Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public. — From *Manufacturers' Record*, Baltimore, of February 9, 1889.

The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal; Vancornlear and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.
HENRY R. WORTHINGTON.

WILL YOUR WINTER BE AS PLEASANT
as the summer you have so much enjoyed?

The Novelty Furnace

will fill your house with the same warm pleasant balmy atmosphere that has made the past season delightful.

Absolutely free from gas.
No dust in the hot-air pipes.
Servants run them successfully.

Moderate in cost. Moderate in consumption.
Peculiar construction. Great durability.

IMMENSE HEATING POWER.

The large heating-surface exposed by the peculiar arrangement, enables it to constantly afford a large volume of healthfully warmed fresh air which is perfect ventilation.

The manner in which the gases are retained and the indirect passage they are forced to make extracts their principal heat endowing the furnace with

EXTRAORDINARY ECONOMICAL QUALITIES.

Send for descriptive pamphlet.

Correspondence carefully attended.

ABRAM COX STOVE CO.

WILKINSON & BANTA, 250 Water St., for New York and Vicinity.

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

TO ARCHITECTS AND CONTRACTORS:
We desire to call your attention to the Superior quality of **Plate Glass manufactured by the**
PITTSBURGH PLATE GLASS CO.
The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.
The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed,** besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.
We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.
With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

THE NATIONAL AUTOMATIC GAS GOVERNOR.

33 Per Cent SAVING IN GAS BILLS GUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted *pro rata*. The higher the pressure, the less the illumination and the larger the gas bill.

The automatic action of Governor, attached to each individual meter, permits the consumer to control his own pressure regardless of the Gas Company, and obligates him to pay for only the minimum supply of Gas required for economic service.

Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere.

Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings, or drapery.

Greatly reduces "Fire Insurance Risks" incident to "Streaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes.

Special discounts to Architects.

WARREN'S "COMPOSITE" FELT,

For Roof Foundations.

A two-ply, composed of one layer of saturated Felt and one of manilla-rope paper with a layer of cement between. Combines durability and strength with lightness and pliability, and is *absolutely* impervious to moisture. *For use under slate, shingles,* etc., it is especially valuable, since as soon as the sun comes upon the roof, the cement contained in the sheething closes tightly around the nails that have been driven through it, and form of the sheathing itself a complete waterproof covering. It is four and one-half times stronger than ordinary roofing.

Send for Samples and Circular No. 12.

BY LOUIS De COPPET BERG.

Series I. Square 8vo. Illustrated with numerous formulæ, diagrams and tables. . $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor-of-safety, centre of gravity, neutral axis, moment of inertia, etc. There follows a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses, spires, masonry, girders, inverted and floor-arches, sidewalks, stairs, chimneys, etc."

These papers are the work of a practising architect, and not of a mere bookmaker or theorist, Mr. Berg, aiming to make his work of the greatest value to the largest number, has confined himself in his mathematical demonstrations to the use of arithmetic, algebra, and plane geometry. In short these papers are in the highest sense practical and valuable.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

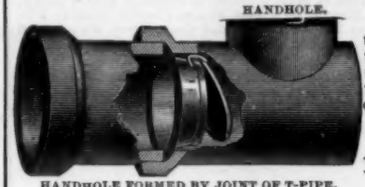
L. CAVANAGH, E. H. SMITH, J. T. BROOKS, } Committee.

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HANDHOLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an Iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

Copyright, 1888, by The J. L. MOTT IRON WORKS.—Plate 29-G.

Porcelain-lined Roman Bath, with Supply Fittings and "Unique" Waste, and Bronzed Iron, Polished or Nickel-plated Cast Brass Legs and Hardwood or Cast Brass Rim. The Roman Bath is the outcome of the growing desire to have plumbing appliances set up without any, or at least very little, cabinet work; for this purpose the Roman Bath is well adapted, as it renders unnecessary the exposure of the pipes and fittings and is very artistic and symmetrical. The fittings, being at the back of the tub, can be easily reached by the bather.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Winidow Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Architects, Builders, and others will confer a favor on the Publishers by mentioning "The American Architect and Building News" when sending for circulars or corresponding with parties advertising in these columns.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 & 57 Broad St., BOSTON, MASS.

Ancient and Modern

LIGHT-HOUSES.

BY MAJOR D. P. HEAP.

vol. Square 8vo. Fully illustrated. $5.00

An interesting scientific and historical treatise, exclusively considering this important theme.

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes INSIDE WORK, Requiring extreme durability, use No. 2 ELASTICA FINISH.

For OUTSIDE WORK, Requiring extreme durability, use No. 1 ELASTICA FINISH

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

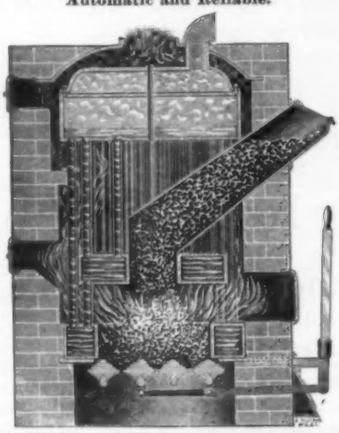
The BRONSON BOILER
For Steam and Hot-Water Heating
Automatic and Reliable.



With BRICK or IRON Settings, as you may prefer, The Bronson is constructed on scientific principles the fire surface being of the best boiler tubing that can be obtained. This boiler exposes more water to the direct action of the fire, either in steam or hot-water heating, than any boiler made. ☞ We are making a specialty of a High Grade all-steel Boiler, which we are anxious to place by the side of anything in the world for actual results. Reliable Agents Wanted. Send for Illustrated Catalogue and Price List. **WESTON ENGINE CO.,**
Sole Manufacturers. Painted Post, N. Y.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

Under the title "*A Tin Roof,*" Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call,* February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph,* February 16, 1889.

Messrs. Merchant & Co., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof.*" Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record,* Baltimore, of February 9, 1889.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

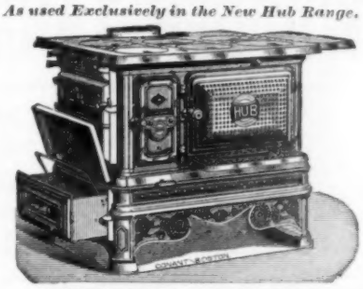
THE BEST PREPARATION FOR HOUSEKEEPING IS A
WIRE GAUZE DOOR
As used Exclusively in the New Hub Range.



PERFECT COOKING
Is the most important item in the domestic economy. By using the Wire Gauze Oven Door with the new Hub Range, the skill of the cook is supplemented by the most perfect cooking apparatus ever made.
Three of the Hub Ranges with Wire Gauze Oven Doors are in constant use at the famous Boston Cooking-School, and are endorsed by them as being better than all others. Insist on your dealer giving you the new Hub Range. It is the very highest grade of cooking apparatus made, and when quality is considered is the lowest in price of any in the market. Over 100,000 Hub Ranges in use. The Hub line of goods are world renowned, and are sold by dealers everywhere. Special circulars sent on application.

SMITH & ANTHONY STOVE CO.
Manufacturers of Hub Stoves, Ranges and Furnaces.
52 & 54 Union Street, Boston, Mass.

MISCELLANEOUS.

Boston, Mass.—*Boylston St.*, three-st'y brick and stone laboratory for Harvard Medical School, 30′ x 91′, flat roof; contract to be let; architect, W. Whitney Lewis.

Chicago, Ill.—Libby Prison Museum Co., two-st'y engine-house, Wabash Ave.; cost, $19,000; architect, C. M. Palmer.

Cincinnati, O.—Sisters of Charity, hospital and chapel, Lock St.; cost, $7,500; architect, A. C. Nash.

Harrisburgh, Pa.—The permits granted by the city-engineer show that the building improvements are not confined to any quarter of the city, and all sections will share in the benefits of the boom. The buildings now going up or to go up are of a good class, and an ornament to the city. There has been a scarcity of modern houses to small families of moderate means. There will be plenty of snug houses for tenants.

Philadelphia, Pa.—*Schurz La. and Freeland Ave.*, one-st'y stone engine-house; owners, A. Flanagan & Son, 105 Grape St., Manayunk.

Providence, R. I.—*Bates St.*, frame safe manufactory; owner, P. W. Baxter.

St. Louis, Mo.—Four-st'y brick hospital; cost, $60,000; owners, Alexian Bros.; architect, L. Kledus.

PROPOSALS.

Y. M. C. A. BUILDING.
[At Montreal, Can.]

The Young Men's Christian Association of Montreal will receive tenders **up to May 15, 1889, at 3 o'clock**, for the erection and completion of a Young Men's Christian Association Building at Montreal.

Tenders can be made for the entire work, or for the different branches separately.

The Committee do not bind themselves to accept the lowest or any tender.

Plans and specifications can be seen at the offices of the Young Men's Christian Association, Montreal, or at the office of Messrs. Fuller & Wheeler, architects, Albany, N. Y.

All tenders to be sealed and addressed to
D. A. BUDGE,
Secretary, Young Men's Christian Association,
697 Montreal, Can.

STATE-HOUSE.
[At Topeka, Kan.]

Proposals will be received **up to 12 o'clock M., on May 20, 1889,** for the following work on the new State-House at Topeka, Kan:

The roofing of the main building and dome.

The hollow tile and brick floor, arches and ceiling arches, etc., and all remaining iron-work, brass-work, etc.

Plans can be seen at the office of the State-House Commissioners at the Capitol Building in Topeka, Kan.

Printed specifications can be had on application to the above office.

Any or all proposals may be rejected.

By order of the Board of State-House Commissioners.
698

Proposals for enamelled bricks. Office of Building for Library of Congress, 145 East Capitol Street, Washington, D. C., April 23, 1889. Sealed proposals for furnishing and delivering 550,000, more or less enamelled bricks for the Building for the Library of Congress in this city, will be received at this office until 2 o'clock P. M., on Thursday the sixteenth day of May, 1889, and opened immediately thereafter in presence of bidders. Specifications, general instructions and conditions, and blank forms of proposal may be obtained on application to this office. BERNARD R. GREEN, Superintendent and Engineer.

PROPOSALS.

Highland Park, Ill., March 30, 1889. Sealed proposals, in triplicate, will be received at this office until 10 o'clock A. M., Tuesday, April 30, 1889, and then opened for furnishing all material and labor, and erecting at Fort Sheridan, Ill., the following buildings, viz.: One barrack wing for six companies, one store-house, one guard-house, one quartermaster's stable, one double set of non-commissioned officers' quarters, two sets field officers' quarters, seven sets captains' quarters, fifteen sets lieutenants' quarters, one building for shops, one bakery and one coal-shed. Subject to an increase or decrease of twenty per cent in the number of lieutenants' quarters. The Government reserves the right to reject any or all bids, or parts thereof. Bidders are requested to state the time required to complete the work. All information furnished upon application to this office. Detailed plans and specifications can also be seen at the office of the undersigned in the Pullman Building, Chicago, Ill., and at the Depot Quartermaster's office, New York City. Envelopes containing proposals will be marked "Proposals for Buildings at Fort Sheridan, Ill.," and addressed to the undersigned. CROSBY P. MILLER, A. Q. M., United States Army.

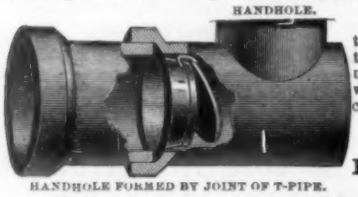
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HANDHOLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."

THE COLUMBUS WROUGHT STEEL KITCHEN AND PANTRY

Displaces all others wherever introduced — SINKS — Painted, Galvanized, Enameled

Send for Descriptive Circular and Prices to

THE KILBOURNE & JACOBS MFG. CO. SOLE MANUFACTURERS, COLUMBUS, O.

STEWART CERAMIC COMPANY,

312 PEARL ST., Cor. Peck Slip, NEW YORK.

Sole Manufacturers under Morahan's Patents of

THE CELEBRATED SOLID WHITE CROCKERY STATIONARY WASH-TUBS.

SHOWING THREE TUBS SET UP.

The only Perfect Sanitary Tubs now in Existence.

VERY STRONG.

No seams to open. Absolute cleanliness secured for all time.

WELL GLAZED.

Will not absorb, leak or decay.

The only Solid White Crockery Wash-tub ever made in the world. Do not buy imitations until you see the genuine "Morahan's Patent," stamped on the front of every tub. Wash-board and Soap-cup moulded in every set. Will outlast any house.

Solid White Crockery Sinks, Comprising Butler's Pantry, Kitchen, Slop, etc.,

Made of same material as the tubs. Very strong, well glazed, no labor required to keep clean.

LIBERAL TERMS TO THE TRADE. SEND FOR PRICE-LIST AND CATALOGUE.

THE

J. L. MOTT IRON WORKS

86, 88 and 90 Beekman Street, N. Y.

—AND—

311 and 313 Wabash Avenue, Chicago.

MOTT'S

(PATENT)

Pedestal Bidet,

With Fittings for Hot and Cold Supply and Waste, Open Seat and Cover, and Marble Floor Slab.

No well appointed Bath-Room is complete without a Bidet that it has heretofore been generally omitted, was due to the difficulty and expense of fitting up the ordinary Bidet Pan in cabinet work to make it a sightly, cleanly and handsome fixture. Mott's Pedestal Bidet is one piece of Porcelain, tinted a delicate Ivory, with the fittings of polished or nickel-plated Brass. It is eminently practical and in accord with the requirements of first class modern plumbing.

Copyright, 1888, by the J. L. Mott Iron Works.— Plate 388 G.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Architects, Builders, and others will confer a favor on the Publishers by mentioning "The American Architect and Building News" when sending for circulars or corresponding with parties advertising in these columns.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., **84 William St., N. Y.**

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

SAYLOR'S

AMERICAN PORTLAND CEMENT

has for sixteen years, been in successful competition with the ***Best*** of the foreign brands and is greatly superior in quality to the average of Portland Cements brought to this Country.

Starting with a very limited production we have been compelled through greatly increased demands to enlarge our capacity to 200,000 barrels per annum, and are now prepared to fill orders promptly.

For large contracts we can deliver in both Cotton Duck and strong Paper Bags by which there would be a saving of about 10 per cent on the cost in barrels.

We solicit correspondence with Architects, Engineers and Contractors. Address for full particulars. (Send for Pamphlet.)

VOSBURG TUNNEL.

OFFICE OF CONTRACTORS, VOSBURG, PA., June 26, 1886.

GENTLEMEN:—

We have used in the construction of our work, 7,500 barrels of your Portland, and 1,800 barrels of your Anchor Rosendale Cement, which has given the best satisfaction. The tests made from day to day, for the past year, have established its uniform quality and strength.

Yours truly, LENTZ & CO.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.
HENRY R. WORTHINGTON.

WILL YOUR WINTER BE AS PLEASANT
as the summer you have so much enjoyed?

The Novelty Furnace

will fill your house with the same warm pleasant balmy atmosphere that has made the past season delightful.

Absolutely free from gas.
No dust in the hot-air pipes.
Servants run them successfully.

Moderate in cost. Moderate in consumption.
Peculiar construction. Great durability.

IMMENSE HEATING POWER.

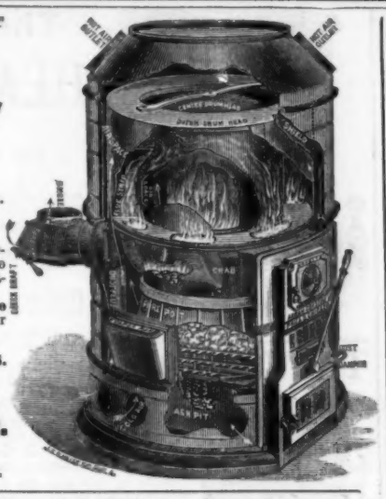
The large heating-surface exposed by the peculiar arrangement, enables it to constantly afford a large volume of healthfully warmed fresh air which is perfect ventilation.

The manner in which the gases are retained and the indirect passage they are forced to make extracts their principal heat endowing the furnace with

EXTRAORDINARY ECONOMICAL QUALITIES.

Send for descriptive pamphlet.
Correspondence carefully attended.

ABRAM COX STOVE CO.
Philadelphia. Chicago.
WILKINSON & BANTA, 250 Water St., for New York and Vicinity.



Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

ARCHITECTURAL BOOKS.

Sold at Bookstores. Sent, Postpaid on receipt of Price by

TICKNOR & COMPANY, BOSTON, MASS.

SAFE BUILDING.

By Louis De Coppet Berg. Vol. I. Square 8vo. Illustrated. $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor of safety, centre of gravity, neutral axis, moment of inertia, etc. There follow a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses, spires, masonry, girders, inverted and floor arches, sidewalks, stairs, chimneys, etc."

ANCIENT AND MODERN LIGHT-HOUSES.

By Major D. P. Heap. 1 vol. Square 8vo. Fully illustrated. $5.00.

Ancient Light-Houses — Eddystone — Bell Rock — Skerryvore — Other Lighthouses with Submarine Foundations — Minot's Ledge — Spectacle Reef — Tillamook Rock — Northwest Seal Rock — Light houses of the Atlantic Coast of the United States — Rothersand Light Tower — Fourteen-Foot Bank Light House, Delaware Bay — Skeleton Iron Light-Houses — Characteristics of Light-Houses — Isle of May Light-House — Miscellaneous Lights — Light-House Administration.

BUILDING SUPERINTENDENCE.

A MANUAL: For young Architects, Students and others interested in Building Operations as carried on at the present time. By T. M. Clark, Fellow of the American Institute of Architects. 1 vol. 8vo. 336 pages. Illustrated with 194 Plans, Diagrams, etc. Price, $3.00.

This volume has been used for years as a text-book in the chief Architectural Schools of the United States.

HOMES AND ALL ABOUT THEM.

By E. C. Gardner. 716 pages. Illustrated. $2.50.

Invaluable instructions and suggestions as to interior decoration, exterior finish, and varied forms of architecture.

MODERN PERSPECTIVE.

A Treatise upon the Principles and Practice of Plane and Cylindrical Perspective, by William R. Ware, Professor of Architecture in the School of Mines, Columbia College. 1 vol. 12mo. 321 pages, with 27 plates in a portfolio. $5.00.

This is by far the most exhaustive of modern works on the subjects relating to perspective, plane and panoramic, and will be of great value to all architects and artists, and others interested in the problems of art. The scientific and pictorial aspects of these investigations are carefully and thoroughly considered, both independently and in their connection with drawing; and the propositions of the author are illustrated by plates of architectural objects and perspective plans. An invaluable book for artists, architects, draughtsmen, and civil engineers.

SKETCHES ABROAD.

By J. A. Schweinfurth, Architect. This contains 30 plates, reproduced in *fac simile* from the author's sketches in pen, pencil, and water colors, by the most approved processes, and printed on 15 x 20 heavy plate paper, in specially designed portfolio. The edition is limited to 250 copies for sale, each of which is numbered. Price, $15.00 per set.

THE OPEN FIREPLACE IN ALL AGES.

By J. Pickering Putnam, Architect. With handsome and large type, pages and binding, fine and heavy paper, and with over three hundred illustrations, including numerous *chefs d'œuvres* of designs of Fireplaces and interior decoration, contributed for this edition by the ablest Architects of the country. 1 vol. 8vo. $4.00.

ARTISTIC HOMES:

IN CITY AND COUNTRY. By A. W. Fuller, Architect. Oblong folio. Fourth Edition, enlarged and improved. 76 full-page illustrations of rural and urban homes, many of which are from gelatine. Also one colored plate. $4.50.

DECENNIAL INDEX OF ILLUSTRATIONS

IN THE AMERICAN ARCHITECT AND BUILDING NEWS, 1876–85. 8vo. Price, $2.00.

A carefully-made topical index to the thousands of illustrations printed in "The American Architect" for the past ten years, with the architects and costs of buildings. Illustrated.

DISCOURSES ON ARCHITECTURE. By E. E. Viollet-Le-Duc. With many Steel Plates and Chromos, and hundreds of Wood-cuts. 2 vols. 8vo. $15.00.

ART FOLIAGE. By J. K. Colling. Entirely new plates from the latest enlarged London edition. Folio. $10.00.

MURAL PAINTING. By Frederic Crowninshield. 1 vol. Square 8vo. With numerous full-page illustrations. $3.00.

HOME SANITATION. A Manual for Housekeepers. 1 vol. 16mo. 50 cents.

HOUSEHOLD SANITATION. By William E. Hoyt. 16mo. 30 cents. Paper covers, 15 cents.

LECTURES ON THE PRINCIPLES OF HOUSE-DRAINAGE. By J. Pickering Putnam. With Plates and Diagrams. 16mo. 75 cents.

MONOGRAPHS OF AMERICAN ARCHITECTURE.

This series was designed with a view to illustrating the most notable, imposing, and interesting of our American public and semi-public buildings, with adequate groups of large and attractive pictures, carefully printed on plate paper, and with their absolute accuracy ensured by the use of the photographic process. The edifices thus illustrated are among the most conspicuous on the continent, by reason of their great size, or architectural value; and a careful study of their proportions will be of interest to all architects and students of the fine arts. The copious array of details given adds to the practical working and studying availability of the Monographs; while the beauty of the pictures as works of art should ensure them a place in all libraries where art works are sought and cherished.

NO I. HARVARD LAW SCHOOL.

Are You Building or Remodelling?

SPURR'S NATURAL WOOD VENEERS.

—

SPURR'S PATENT WOOD CARVINGS.

WE can give your new house an elegant hardwood finish at moderate cost with our VENEERS—lasting and beautiful. In remodelling your old home, do not tear out your painted woodwork. Let us transform it into a hardwood finish with our VENEERS.

OUR patent Wood Carvings are used by many architects in connection with solid woodwork. Can be had in a large variety of designs, and are indistinguishable from hand-carving.

WORKMEN SENT ANYWHERE.
Views of interiors finished by us, with descriptive circulars, sent upon application.

Illustrated Catalogues and Reports.

Edwin A. Jackson & Bro.,

50 BEEKMAN STREET,

NEW YORK.

WARREN'S "COMPOSITE" FELT,

For Roof Foundations.

A two-ply, composed of one layer of saturated Felt and one of manilla-rope paper with a layer of cement between. Combines durability and strength with lightness and pliability, and is *absolutely* impervious to moisture. *For use under slate, shingles*, etc., it is especially valuable, since as soon as the sun comes upon the roof, the cement contained in the sheathing closes tightly around the nails that have been driven through it, and form of the sheathing itself a complete waterproof covering. It is four and one-half times stronger than ordinary roofing.

Send for Samples and Circular No. 12.

WARREN CHEMICAL & MFG. CO.

114 John Street, New York.

Comments of the Press on a New Book

By MERCHANT & CO.

ENTITLED:

"A TIN ROOF."

A Valuable Book.

UNDER the title "*A Tin Roof*," Messrs. Merchant & Co., Philadelphia, have published a valuable work on the subject of roofing materials. No architect can afford to be without the book, as it treats very fully on a subject with which he should be conversant. The book has been compiled by one thoroughly versed in the subject of tin roofing, and it touches on different features of the subject which have heretofore never been published, and it is to be questioned whether the information could be obtained by architects from the roofing trade. The closing paragraph of the book is as follows: "We are prepared to prove that we were the first to introduce guaranteed plates and stamp every sheet with the name of the brand and thickness; and having also done away with the imperfect or waste sheets to further protect architects (who wish to specify and property owners who want to use the best), we feel that we have a right, under these circumstances, to ask that our guaranteed brands shall not be specified along with other brands in the market, which are inferior in quality, coating, weight and assortment." Architects throughout the country will do well to secure a copy of the book, which can be done by addressing Merchant & Co., Philadelphia.—*Philadelphia Evening Call*, February 18, 1889.

Something Worth Reading.

"*A Tin Roof*" is the title of a little book just issued by Messrs. Merchant & Co., 517 Arch Street, Philadelphia. The purpose of the publication is to supply to builders, architects, and the general public some exact information as to the best methods of constructing a tin roof and as to the right materials to be used to secure satisfactory and permanent results. We especially recommend the book, which is intended for gratuitous distribution, to mill-owners. They are very apt to entrust the matter of roofing wholly to builders, and they usually know very little about the character of the tin used or the excellence or defectiveness of the job. This pamphlet will help them to protect their interests. It is very explicit, perfectly comprehensible, and we think wholly trustworthy. It is quite profusely illustrated, and the cuts indicate processes of applying tin-roofing which insure excellence.—*Philadelphia Telegraph*, February 16, 1889.

MESSRS. MERCHANT & CO., of Philadelphia, are about to issue a work on the subject of tin roofing for the benefit of architects, which they have had compiled at considerable expense and labor by one thoroughly versed in the subject of tin roofing. It touches on different features of the subject which have heretofore never been published. While this work is issued partly as an advertisement of their guaranteed plates, it will be found to contain very valuable information. It is for distribution to those who want the information, though it is not their purpose to send it out broadcast, as it is too valuable a work in itself to go into the waste basket. The book will be nicely bound, and the title will be "*A Tin Roof*." Messrs. Merchant & Co., have done all in their power to bring about the use of a better class of material, and were the first to introduce plates every sheet stamped with the brand and thickness, and as the doing away with the wasters, or imperfect sheets, has been the cause of great loss of profit to this concern, in their determination to keep faith with the architectural profession, they find that in some cases even leading architects are to-day simply using their brands as a figure-head, and are inserting in their specifications not only cheaper brands than theirs, but brands the wasters of which can be obtained and will be used. Consequently they have now taken the stand to simply ask the architect to drop their brands entirely if they are to be used with inferior goods, as they do not care to be held responsible by their clients when the roof proves inferior by reason of the use of cheaper material than they offer to the public.—From *Manufacturers' Record*, Baltimore, of February 9, 1889.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

PROPOSALS.

BRONZE STATUARY. [At Cleveland, O.]

Office of the Executive Committee of the Board of Commissioners, Cuyahoga County, Soldiers' and Sailors' Monument, Cleveland, O., April 29, 1889.

Sealed proposals will be received by the Executive Committee **until 12 o'clock M., of Monday, May 20, 1889,** from bronze founders actually engaged in the business, for the bronze castings and other work pertaining thereto to wholly complete and set in place on the site selected in Cleveland, O., when the Committee directs, a group of artillery soldiers called the "At Short Range," composed of nine figures, each about 7′ 6″ high, mounted on a brass or plinth 7 feet by 19 feet.

Bids to be endorsed "Proposals for Bronze Statuary," and addressed to the care of Levi F. Bauder, Secretary of the Board of Commissioners, Wick Block, Cleveland, O.

The plaster models can be seen at the studio on Rockwell Street, Cleveland, in rear of the City-Hall, where a member of the Committee will give any additional information if desired, or by addressing Levi T. Scofield, architect, 22 Case Building, Cleveland, O.

Each bid to be accompanied with a written guaranty, signed by two responsible sureties.

The Commissioners reserve the right to reject any or all bids, to accept or decline to close a contract as in their discretion they shall deem it their duty to do.

The time for completion and delivery of castings mounted must be stated, and will be considered in awarding the contract.

Bids will only be received for first-class standard statuary bronze and first-class workmanship.

Payments will be made monthly, retaining 10 per cent until the contract is completed.

WM. J. GLEASON, Chairman.
JAMES BARNETT,
JAMES HAYR,
J. B. MOLYNEAUX,
LEVI T. SCOFIELD,
Executive Committee.

PROPOSALS.

RESERVOIR. [At Buffalo, N. Y.]

OFFICE OF THE WATER COMMISSIONERS,
No. 1 CITY AND COUNTY HALL,
BUFFALO, N. Y., April 1, 1889.

Sealed proposals will be received at this office **until 3 P. M. Tuesday, May 21, 1889,** for the construction of a receiving and distributing reservoir for the Buffalo City Water-works on the property bounded by Best, Dodge, Jefferson and Masten Streets (area about twenty-two acres); capacity of reservoir about 125,000,000 gallons.

Proposals must be made upon the printed forms that have been provided.

Plans and specifications can be seen and examined at this office, giving full description of the work and materials required.

Specifications will be mailed to parties applying for the same.

The Commissioners reserve the right to accept or reject any or all bids, or to accept any part of a bid, as in their judgment the interest of the city may require.

L. P. REICHERT,
JAMES RYAN,
S. K. WORTHINGTON,
Water Commissioners.

699

PENITENTIARY. [At Mansfield, O.]

OFFICE OF THE BOARD OF MANAGERS,
INTERMEDIATE PENITENTIARY,
MANSFIELD, O., April 23, 1889.

Sealed proposals will be received at this office **until 12 o'clock M. on the 16th day of May, 1889,** for completing the mason-work of the front buildings, including gables, towers, dormers, etc., above the top line of cornice; also, the iron-work of the third story ceiling, and all the iron-work of the roofs and towers of the front buildings.

Bids will be received separately for the labor and materials for the following classes of work, viz.: Limestone-facing, cut-stone, brickwork, wrought-iron beams and chanels, rods, ties, anchors, expansion bolts, cast-iron resting-plates, etc.

PROPOSALS.

All to be done in accordance with drawings and specifications.

Additional information can be obtained at this office, or at the office of Levi T. Scofield, architect, 22 Case Building, Cleveland, O., where drawings and specifications can be seen.

The Board reserves the right to reject any or all bids.

WM. MONAGHAN,
W. J. ELLIOTT,
B. F. CRAWFORD,
Managers.

699

STATE-HOUSE. [At Topeka, Kan.]

Proposals will be received **up to 12 o'clock M., on May 20, 1889,** for the following work on the new State-House at Topeka, Kan:

The roofing of the main building and dome.

The hollow tile and brick floor, arches and ceiling arches, etc., and all remaining iron-work, brass-work, etc.

Plans can be seen at the office of the State-House Commissioners at the Capitol Building in Topeka, Kan.

Printed specifications can be had on application to the above office.

Any or all proposals may be rejected.

By order of the Board of State-House Commissioners.

698

SCHOOL-HOUSE. [At Wyoming, O.]

WYOMING, O., April 17, 1889.

Sealed proposals will be received by G. A. Carnahan, Clerk of the Wyoming School at the office of Samuel Hannaford, architect, in Bradford Block, n w cor. of Sixth and Vine Streets, Cincinnati, O., **until 12 o'clock of the 17th day of May, 1889,** for enlarging and improving the Wyoming Schoolhouse, according to plans and specifications to be seen at the above named office, on and after April 17, 1889.

Each bid must contain the name of each person interested in the same, and be accompanied by a sufficient guaranty of some disinterested person that, should the bid be accepted, a contract will be entered into and the performance thereof properly secured.

Also, at the same time and place, bids will be received for heating and ventilating said schoolhouse according to plans and specifications to be seen at the office of said architect, Samuel Hannaford.

None but the lowest responsible bids will be received, and the Board may reject all bids.

By order of the Board.

G. A. CARNAHAN, Clerk.
DR. J. I. TAYLOR, President.

698

Proposals for enamelled bricks. Office of Building for Library of Congress, 145 East Capitol Street, Washington, D. C., April 23, 1889. Sealed proposals for furnishing and delivering 550,000, more or less enamelled bricks for the Building for the Library of Congress in this city, will be received at this office until 2 o'clock P. M., on Thursday the sixteenth day of May, 1889, and opened immediately thereafter in presence of bidders. Specifications, general instructions and conditions, and blank forms of proposal may be obtained on application to this office. BERNARD R. GREEN, Superintendent and Engineer.

697

Y. M. C. A. BUILDING. [At Montreal, Can.]

The Young Men's Christian Association of Montreal will receive tenders **up to May 15, 1889, at 3 o'clock,** for the erection and completion of a Young Men's Christian Association Building at Montreal.

Tenders can be made for the entire work, or for the different branches separately.

The Committee do not bind themselves to accept the lowest or any tender.

Plans and specifications can be seen at the offices of the Young Men's Christian Association, Montreal, or at the office of Messrs. Fuller & Wheeler, architects, Albany, N. Y.

All tenders to be sealed and addressed to

D. A. BUDGE,
Secretary Young Men's Christian Association,
Montreal, Can.

J. L. MOTT IRON WORKS

86, 88 and 90 Beekman Street, N. Y.

—AND—

311 and 313 Wabash Avenue, Chicago.

Copyright, 1888, by the J. L. Mott Iron Works.— Plate 388 G.

MOTT'S

(PATENT)

Pedestal Bidet,

With Fittings for Hot and Cold Supply and Waste, Open Seat and Cover, and Marble Floor Slab.

No well appointed Bath-Room is complete without a Bidet that it has heretofore been generally omitted, was due to the difficulty and expense of fitting up the ordinary Bidet Pan in cabinet work to make it a sightly, cleanly and handsome fixture. Mott's Pedestal Bidet is one piece of Porcelain, tinted a delicate Ivory, with the fittings of polished or nickel-plated Brass. It is eminently practical and in accord with the requirements of first class modern plumbing.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Architects, Builders, and others will confer a favor on the Publishers by mentioning "The American Architect and Building News" when sending for circulars or corresponding with parties advertising in these columns.

Bricks and Terra-Cotta.

BRICKS!

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 & 57 Broad St., BOSTON, MASS.

THE "COMFORT"

BLIND FASTENER.

PATENT APPLIED FOR.

THE "Comfort" Blind Fastener, as illustrated in the above cut, is intended to simplify the opening and closing of blinds. By the use of this Fastener, the necessity of leaning out of window is dispensed with, which of itself is a very great advantage, especially in stormy weather.

There is, also, no possibility of the blinds being lifted from their hangings where the "Comfort" Fastener is used.

It can be readily attached to any blind at an expense very trifling when compared with the advantages it possesses.

Manufactured and for sale by

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes **INSIDE WORK,** Requiring extreme durability, use No. 2 ELASTICA FINISH.

For **OUTSIDE WORK,** Requiring extreme durability, use No. 1 ELASTICA FINISH

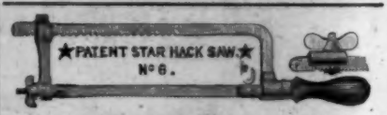
For Sale by all dealers in masons' materials. *Send for Pamphlet.*



Both the Frames and Blades of our Star Hack Saws are now as perfect as human skill can make them. The Frame is steel, polished and Nickel plated, and will hold all blades from 3 to 12 inches, and face them in four directions. With the extra clamp, as seen in the cut, all broken blades can be used. These Saws have a file temper, and one five cent Blade will cut iron or soft steel steadily for several hours, doing more work than a dollar's worth of files.

Price of No. 6 Frame	$1 00

AUSTIN'S CORRUGATED

EXPANDING CONDUCTOR,

OR LEADER.

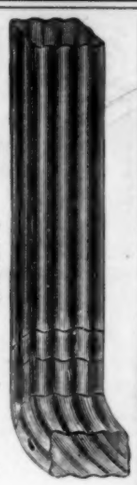
The ONLY ORIGINAL EXPANDING CONDUCTOR in the market, has been used for years and THOROUGHLY TESTED in all the PRINCIPAL CITIES and TOWNS in the UNITED STATES and is SPECIFIED by ARCHITECTS generally THROUGHOUT THE COUNTRY.

AUSTIN, OBDYKE & CO.,

Sole Manufacturers. PHILADELPHIA.

MAIN OFFICE:

1705 Chestnut Street, Philadelphia, Pa.



For sale by all Jobbers and Dealers in Tinners' Supplies throughout the country.

Correspondence Solicited, and Lowest Prices Guaranteed.

THE ONLY REAL

EXPANDING CONDUCTOR.

THE IRWIN & REBER

PATENT

EXPANDING WATER CONDUCTOR.

MANUFACTURED BY THE

S. S. S. Conductor Co.

LIMITED,

163 Lacock Street,

ALLEGHENY, PA.

The Standing Seam allows of an easy and secure fastening, keeping the pipe far enough from the wall to make any overflow from the eave pipe or head, run down the spout, and not the wall; and will open, in case of freezing, so as to prevent bursting, and still remain double-locked and water-tight.

Made in 6-foot lengths, in a single sheet of

SOFT STEEL,

Either Galvanized, Kalameined or Leaded.

AGENTS FOR NEW ENGLAND STATES.

E. B. BADGER & SON.

Coppersmiths & Galvanized Iron Workers.

Nos. 63 & 65 Pitts St.,

BOSTON, MASS.

Best Conductor of all.

RITCHIE'S

Corrugated Expanding

Conductor.

Guaranteed no Infringement.

This pipe has all the advantages of other corrugated conductors in not bursting from freezing, and in addition:

It has no soldered joints.

The enlarged coupling makes the conductor of even size inside throughout.

It is galvanized, after formation, great care being taken to secure a smooth coating of zinc free from dross and impurities.

MANUFACTURED BY

LAMB & RITCHIE,

Boston Spiral Tube Works,

CAMBRIDGEPORT, MASS.

AESCHLIMANN & PELLARIN,

Successors to J. Pasquali & C. Aeschlimann.

Manufacturers of Roman and Venetian

MARBLE MOSAICS,

STAINED GLASS. MOSAICS. METAL WORK. WOOD WORK. DECORATION.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

INVALUABLE TO ARCHITECTS.

Safe Building.

BY LOUIS De COPPET BERG.

Series I. Square 8vo. Illustrated with numerous formulæ, diagrams and tables. . $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor-of-safety, centre of gravity, neutral axis, moment of inertia, etc. There follows a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses, spires, masonry, girders, inverted and floor-arches, sidewalks, stairs, chimneys, etc."

These papers are the work of a practising architect, and not of a mere bookmaker or theorist, Mr. Berg, aiming to make his work of the greatest value to the largest number, has confined himself in his mathematical demonstrations to the use of arithmetic, algebra, and plane geometry. In short these papers are in the highest sense practical and valuable.

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

A SUGGESTION.

ARCHITECTS AND BUILDERS

Don't specify simply old style tin when wanting the ***best that can be made.*** Have the specifications read as follows: "The Genuine Taylor 'Old Style' **Brand** Roofing Tin, guaranteed by N. & G. Taylor Co., Philadelphia; every sheet stamped with brand, thickness, trade mark, and their name."

This Tin properly put on and taken care of will last as long as the building.

Detroit Spring Works, foundry, Michigan Ave.; cost, $8,000; contractor, Henry Career.

Exeter, N. H.—Nearly one hundred of the leading citizens have united in forming a Board of Trade for this town. Hon. John J. Bell was elected President, and a strong Executive Committee, as well as one on New Industries and Town Improvements, were appointed. It is the purpose of the citizens, through this Board, to make the commercial advantages of their town more widely known, and to extend substantial encouragement to all desirable manufacturing interests that may locate among them.

New York, N. Y.—*Morris Ave.*, w s, 60' n One Hundred and Fifty-eighth St., one-st'y brick storage, tin roof; cost, $15,000; owner, N. Y. C. & H. R. R. Co., Grand Central Depot; architect, Walter Katte, Grand Central Depot.

Another enlargement to the American Museum of Natural History is contemplated; J. C. Cady & Co. have prepared plans.

COMPETITION.

MUNICIPAL BUILDINGS.
[At New York, N. Y.]

NEW YORK, N. Y., April 22, 1889.

NOTICE TO ARCHITECTS.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 20th day of June, 1889,** for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller,
WALTON STORM, Chairman Finance Committee, Board of Aldermen.
} Committee Commissioners of the Sinking Fund.

703

PROPOSALS.

CHAPEL AND BARN.
[At Xenia, O.]

OFFICE OF THE SUPERINTENDENT, OHIO SOLDIERS' AND SAILORS' ORPHANS' HOME, XENIA, O., April 29, 1889.

Sealed proposals will be received at the office of the Superintendent of the Ohio Soldiers' and Sailors' Orphans' Home, near Xenia, O., **up to 12 o'clock (noon) of the 28th day of May, 1889,** for performing the labor and furnishing the materials necessary for enlarging the chapel at said Home, in accordance with plans and specifications on file in this office, to be open for public inspection from and after May 4, to May 28, 1889, inclusive.

Separate and distinct proposals to be made for each separate and distinct kind of labor necessary in doing the work.

Also, at the same time and place, sealed proposals will be received for performing the labor and furnishing the materials necessary to the erection of a barn according to plans and specifications on file in this office and open for public inspection from and after May 4, to May 28, inclusive, except that said Ohio Soldiers' and Sailors' Orphans' Home has 106,000 (one hundred and six thousand) bricks; forty (40) perch of stone for foundation, and the following bill of lumber:

3,663 ft. Norway.	10 8x8-10.
5,600 ft. white pine.	1 8x8-14.
228 2x8-26.	58 2x6-20.
33 2x12-20.	4 4x6-16.
33 2x12-16.	33 2x4-16.
69 2x12-12.	16 2x8-16.
4 3x4-28.	

Which are to be used in the construction of said barn by the contractor or contractors.

The contractor or contractors to furnish all the labor and all *other* materials except the above *specified* materials, necessary to the erection of said barn.

Separate and distinct bids to be made for each separate and distinct trade and kind of labor necessary in doing the work.

Bids must be accompanied by a bond of the proposer with sufficient sureties conditioned that if the proposal be accepted the party proposing will enter into a proper contract, and faithfully perform his or their contract or contracts in accordance with said proposal and the plan or plans, specifications and descriptions which are a part of such contract or contracts.

All bids must be addressed to the undersigned and indorsed "Proposals for Enlarging Chapel and Building Barn."

NOAH THOMAS, Superintendent.

STATE-HOUSE.
[At Topeka, Kan.]

Proposals will be received **up to 12 o'clock M., on May 20, 1889,** for the following work on the new State-House at Topeka, Kan:

The roofing of the main building and dome.

The hollow tile and brick floor, arches and ceiling arches, etc., and all remaining iron-work, brass-work, etc.

Plans can be seen at the office of the State-House Commissioners at the Capitol Building in Topeka, Kan.

Printed specifications can be had on application to the above office.

Any or all proposals may be rejected.

By order of the Board of State-House Commissioners.

698

PROPOSALS.

SCHOOL-HOUSE.
[At Bevis, O.]

Sealed proposals will be received at the office of the Clerk of the Board of Education of Colerain Township, Hamilton County, Ohio, at Bevis, Ohio, **until 12 o'clock at noon on the 18th day of May, 1889,** for building a school-house on the lot situated in District No. 5, according to the plans and specification on file at Bevis Post-office with Geo. A. Wyckoff.

Each bid must contain the name of every person interested in the same, and be accompanied by a sufficient guaranty of some disinterested person that, if the bid is accepted, a contract will be entered into and the performance of it properly secured.

The Board reserves the right to reject any and all bids.

By order of the Board of Education.

JOHN R. BEVIS, Clerk of Board of Education.

698

RESERVOIR.
[At Buffalo, N. Y.]

OFFICE OF THE WATER COMMISSIONERS, No. 1 CITY AND COUNTY HALL, BUFFALO, N. Y., April 1, 1889.

Sealed proposals will be received at this office **until 3 P. M. Tuesday, May 21, 1889,** for the construction of a receiving and distributing reservoir for the Buffalo City Water-works on the property bounded by Best, Dodge, Jefferson and Masten Streets (area about twenty-two acres); capacity of reservoir about 125,000,000 gallons.

Proposals must be made upon the printed forms that have been provided.

Plans and specifications can be seen and examined at this office, giving full description of the work and materials required.

Specifications will be mailed to parties applying for the same.

The Commissioners reserve the right to accept or reject any or all bids, or to accept any part of a bid, as in their judgment the interest of the city may require.

L. P. REICHERT,
JAMES RYAN,
S. K. WORTHINGTON,
Water Commissioners.

699

PENITENTIARY.
[At Mansfield, O.]

OFFICE OF THE BOARD OF MANAGERS, INTERMEDIATE PENITENTIARY, MANSFIELD, O., April 23, 1889.

Sealed proposals will be received at this office **until 12 o'clock M. on the 16th day of May, 1889,** for completing the mason-work of the front buildings, including gables, towers, dormers, etc., above the top line of cornice; also, the iron-work of the third story ceiling, and all the iron-work of the roofs and towers of the front buildings.

Bids will be received separately for the labor and materials for the following classes of work, viz.: Limestone-facing, cut-stone, brickwork, wrought-iron beams and chanels, rods, ties, anchors, expansion bolts, cast-iron resting-plates, etc.

All to be done in accordance with drawings and specifications.

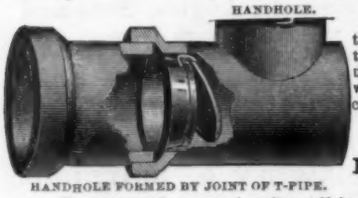
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an Iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."

THE
J. L. MOTT IRON WORKS

86, 88 and 90 Beekman Street, N. Y.

—AND—

311 and 313 Wabash Avenue, Chicago.

MOTT'S

(PATENT)

Pedestal Bidet,

With Fittings for Hot and Cold Supply and Waste, Open Seat and Cover, and Marble Floor Slab.

No well appointed Bath-Room is complete without a Bidet that it has heretofore been generally omitted, was due to the difficulty and expense of fitting up the ordinary Bidet Pan in cabinet work to make it a sightly, cleanly and handsome fixture. Mott's Pedestal Bidet is one piece of Porcelain, tinted a delicate Ivory, with the fittings of polished or nickel-plated Brass. It is eminently practical and in accord with the requirements of first class modern plumbing.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.

(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Architects, Builders, and others will confer a favor on the Publishers by mentioning "The American Architect and Building News" when sending for circulars or corresponding with parties advertising in these columns.

Bricks and Terra-Cotta.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., **84 William St., N. Y.**

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any *"gas oil"* or *"dead oil"* which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

Dorchester Freestone.

The ***strongest*** and ***most durable*** light colored freestone to be had. According to test made by Gen'l Q. A. Gillmore, U. S. A., it withstands a pressure of 9.412 pounds to the square inch. When the New York *Times* pulled down its old building a year ago, in its issue of May 20th, 1888, it said, "The stone of which the old walls were built, is of the best quality of (Dorchester) Nova Scotia sandstone, ***and is in perfect condition after 30 years of exposure to the atmosphere.***"

The building on the S. W. corner of Cedar and Nassua Streets, New York, has just been pulled down and rebuilt, and the Dorchester stone of which it was built, ***after 28 years of exposure,*** was found in such ***excellent*** condition, that ***it was simply cleaned and replaced in the reconstructed building.*** There are innumerable instances in which equally favorable results can be shown.

The stone has been used during the past 35 years in the following and many other buildings.

CONTINENTAL BANK, Nassau St. Built 1856.
H. B. CLAFLIN'S STORES, Worth St. Built 1856.

Giant Metal Sash Chain.
MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.
The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vancornlear and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.
HENRY R. WORTHINGTON.

Lindeman Liquid Filler

Somers, Lindeman & Co.,
NEW YORK,
281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

(Established 1852.)
Fulton St., cor. William, New York.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

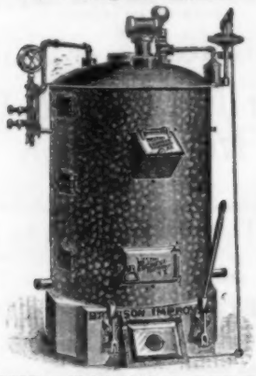
The BRONSON BOILER
For Steam and Hot-Water Heating
Automatic and Reliable.



With BRICK or IRON Settings, as you may prefer, The Bronson is constructed on scientific principles the fire surface being of the best boiler tubing that can be obtained. This boiler exposes more water to the direct action of the fire, either in steam or hot-water heating, than any boiler made. ☞ We are making a specialty of a High Grade all-steel Boiler, which we are anxious to place by the side of anything in the world for actual results. Reliable Agents Wanted. Send for Illustrated Catalogue and Price List. **WESTON ENGINE CO.,**
Sole Manufacturers. Painted Post, N. Y.

CABOT'S BRICK PRESERVATIVE

THIS IS A PECULIAR COMBINATION OF INDESTRUCTIBLE GUMS WITH AN OILY SOLVENT WHICH PREVENTS THE PENETRATION OF WATER INTO EITHER BRICKS OR MORTAR: IT GREATLY IMPROVES THE APPEARANCE OF BRICK-WORK, GIVING IT A RICH EFFECT, FREE FROM GLOSS: THE WHITE EFFLORESCENCE OF SALTS ON THE SURFACE AND THE FORMATION OF FUNGUS IS PREVENTED: AS IT IS MUCH MORE IMPERMEABLE TO WATER IT IS FAR BETTER THAN LINSEED OIL, AND IT IS NOT DESTROYED BY THE LIME OF THE MORTAR: WE CAN RECOMMEND IT FOR USE ON CHIMNEYS, AS IT WILL PREVENT THEIR DISINTEGRATION BY DRIVING RAINS, WHILE SUPERIOR TO THE BEST PAINT FOR THIS PURPOSE, IT IS ALSO MORE ECONOMICAL:

The Smith Hot Blast Apparatus,

For Heating and Ventilating.

No other apparatus has as large and light running a fan wheel by half.

No other apparatus can drive half as large a volume of air over the steam-heating pipes with anywhere near as little power.

No other apparatus handles cold air in the fan and pushes it hot, direct from heater into buildings to be heated.

For further information address,

HUYETT & SMITH MFG. CO., Detroit, Mich.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can *"press the button,"—we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the

STAR ENCAUSTIC TILE COMPANY, (Limited),

Manufacturers of Superior Gas-Burned Plain and Encaustic **FLOORING TILE,** for Hearths and Floors in Banks, Hotels, Depots, etc. Natural Gas the only Fuel Used.

Office & Factory, PITTSBURGH, PA.

Are you aware

THAT The old standard weights of Roofing Plates were 112 lbs. per box IC 14 x 20, and 224 lbs. per box IC 20 x 28—112 sheets per box?

Are you aware

THAT Severe competition and a desire for low-priced plates caused those weights to fall to 108 and 216 lbs., respectively?

Are you aware

THAT Most of the so-called extra coated Roofing Plates to-day do not weigh over 110 lbs. per box IC 14 x 20, and 220 lbs. per box IC 20 x 28?

Are you aware

THAT It is nevertheless claimed for many of these brands that they carry 20 lbs. of coating per box of 14 x 20, and 40 lbs. per box of 20 x 28?

Are you aware

THAT The claim by some that certain Brands of Roofing Plates carry 20 lbs. of coating is entirely disproved by the fact that such plates do not weigh over 110 lbs. per box IC 14 x 20, while the standard weight for ordinary Roofing Plates is 108 lbs. for same size and guage?

Are you aware

THAT We **guarantee** the "**GILBERTSON'S OLD METHOD**" **Extra Coated Roofing Plates** to average not less than 120 lbs. net per box IC 14 x 20, and 240 lbs. per box IC 20 x 28?

Are you aware

THAT We **guarantee** the coating to be from 18 to 20 lbs. per box for the 14 x 20, and 36 to 40 lbs. per box for 20 x 28?

Are you aware

THAT The above facts show the impossibility of placing the "**GILBERTSON'S OLD METHOD**" on the same level as other old style plates, either as regards price or quality?

COMPETITION.

MUNICIPAL BUILDINGS.

[At New York, N. Y.]

NEW YORK, N. Y., April 22, 1889.

NOTICE TO ARCHITECTS.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 20th day of June, 1889,** for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller, WALTON STORM, Chairman Finance Committee, Board of Aldermen. } Committee Commissioners of the Sinking Fund.

COMPETITION.

PROPOSALS.

TO IRON MANUFACTURERS AND BUILDERS. Office of the Light-House Engineer, Third District, Tompkinsville, N. Y., May 11, 1889. Proposals will be received at this office until 12 o'clock, noon, of Wednesday, the 12th day of June, 1889, for furnishing the materials and labor of all kinds necessary for the completion and delivery of the metal-work, and for the erection of the Cold Spring Harbor Light-House, Long Island, N. Y. Separate proposals must be made for each work. Plans, specifications, forms of proposal, and other information may be obtained on application to this office. The right is reserved to reject any or all bids and to waive any defects. D. P. HEAP, Major of Engineers, U. S. A., Light-House Engineer, Third District. 699

Treasury Department, May 8, 1889. Sealed proposals will be received at the office of the Superintendent, Treasury Department, Washington D. C., until two (2) o'clock P. M., on Monday, the 10th day of June, 1889, for the labor and materials required in the completion of the replacing of the disintegrated slate roof with a copper roof on the north and south wings of the United States Treasury Building at Washington, D. C., in accordance with the drawings and specifications, copies of which may be seen and any additional information had upon application at the above office. Each bid must be accompanied by a certified check for five hundred dollars ($500). GEO. S. BATCHELLER, Acting Secretary. 701

May 11, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 31st day of May, 1889, for the labor and materials required in the completion of the approaches to the Court-House, Post-Office, etc., building at Oshkosh, Wis., in accordance with the specification and drawings, copies of which may be had on application at this office and the office of the Superintendent. Each bid must be accompanied by a certified check for $100. JAMES H. WINDRIM, Supervising Architect. 699

May 9, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 29th day of May, 1889, for furnishing the plaster models of ornamental work required for the United States buildings at Los Angeles, Cal., Charlotte, N. C., Ottumwa, Iowa, and Rochester, N. Y. Drawings may be seen, and copies of the specification with blank proposal sheets attached, may be obtained at this office and at the office of the local superintendents. Each bidder must send with this proposal a certified check for $100. JAMES H. WINDRIM, Supervising Architect. 699

To engine and boiler-makers. Office of Light-House Engineer, Ninth and Eleventh Districts, Detroit, Mich., April 29, 1889. Proposals will be received at this office until 4 o'clock P. M., on Thursday, the 6th day of June, 1889, for furnishing the boilers, machinery, etc., for steam fog-signals for Presque Isle, Cheboygan, Old Mackinac Point, Simmons Reef, Beaver Island, Manistee, Point Iroquois and Manitou, Mich.; Chicago, Ill.; Twin River Point and La

PROPOSALS.

CHAPEL AND BARN.

[At Xenia, O.]

OFFICE OF THE SUPERINTENDENT, OHIO SOLDIERS' AND SAILORS' ORPHANS' HOME, XENIA, O., April 29, 1889.

Sealed proposals will be received at the office of the Superintendent of the Ohio Soldiers' and Sailors' Orphans' Home, near Xenia, O., **up to 12 o'clock (noon) of the 28th day of May, 1889,** for performing the labor and furnishing the materials necessary for enlarging the chapel at said Home, in accordance with plans and specifications on file in this office, to be open for public inspection from and after May 4, to May 28, 1889, inclusive.

Separate and distinct proposals to be made for each separate and distinct kind of labor necessary in doing the work.

Also, at the same time and place, sealed proposals will be received for performing the labor and furnishing the materials necessary to the erection of a barn according to plans and specifications on file in this office and open for public inspection from and after May 4, to May 28, inclusive, except that said Ohio Soldiers' and Sailors' Orphans' Home has 106,000 (one hundred and six thousand) bricks; forty (40) perch of stone for foundation, and the following bill of lumber:

3,663 ft. Norway.	10 8x8-10.
5,600 ft. white pine.	1 8x8-14.
228 2x8-26.	58 2x6-20.
33 2x12-20.	4 4x6-16.
33 2x12-16.	33 2x4-16.
69 2x12-12.	16 2x8-16.
4 3x4-28.	

Which are to be used in the construction of said barn by the contractor or contractors.

PROPOSALS.

The contractor or contractors to furnish all the labor and all *other* materials except the above *specified* materials, necessary to the erection of said barn.

Separate and distinct bids to be made for each separate and distinct trade and kind of labor necessary in doing the work.

Bids must be accompanied by a bond of the proposer with sufficient sureties conditioned that if the proposal be accepted the party proposing will enter into a proper contract, and faithfully perform his or their contract or contracts in accordance with said proposal and the plan or plans, specifications and descriptions which are a part of such contract or contracts.

All bids must be addressed to the undersigned and indorsed "Proposals for Enlarging Chapel and Building Barn."

NOAH THOMAS,
Superintendent.

RESERVOIR.

[At Buffalo, N. Y.]

OFFICE OF THE WATER COMMISSIONERS, No. 1 CITY AND COUNTY HALL, BUFFALO, N. Y., April 1, 1889.

Sealed proposals will be received at this office **until 3 P. M. Tuesday, May 21, 1889,** for the construction of a receiving and distributing reservoir for the Buffalo City Water-works on the property bounded by Best, Dodge, Jefferson and Masten Streets (area about twenty-two acres); capacity of reservoir about 125,000,000 gallons.

Proposals must be made upon the printed forms that have been provided.

Plans and specifications can be seen and examined at this office, giving full description of the work and materials required.

Specifications will be mailed to parties applying for the same.

The Commissioners reserve the right to accept or reject any or all bids, or to accept any part of a bid, as in their judgment the interest of the city may require.

L. P. REICHERT,
JAMES RYAN,
S. K. WORTHINGTON,
Water Commissioners.

TO ARCHITECTS AND CONTRACTORS:

We desire to call your attention to the Superior quality of **Plate Glass manufactured by the**

PITTSBURGH PLATE GLASS CO.

The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.

The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed,** besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.

We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.

With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

MOTT'S

(PATENT)

Pedestal Bidet,

With Fittings for Hot and Cold Supply and Waste, Open Seat and Cover, and Marble Floor Slab.

No well appointed Bath-Room is complete without a Bidet that it has heretofore been generally omitted, was due to the difficulty and expense of fitting up the ordinary Bidet Pan in cabinet work to make it a sightly, cleanly and handsome fixture. Mott's Pedestal Bidet is one piece of Porcelain, tinted a delicate Ivory, with the fittings of polished or nickel-plated Brass. It is eminently practical and in accord with the requirements of first class modern plumbing.

Price $1.25 post paid.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes INSIDE WORK, Requiring extreme durability, use No. 2 ELASTICA FINISH.

For OUTSIDE WORK, Requiring extreme durability, use No. 1 ELASTICA FINISH.

1705 Chestnut Street, Philadelphia, Pa.

For sale by all Jobbers and Dealers in Tinners' Supplies throughout the country.

Correspondence Solicited, and Lowest Prices Guaranteed.

THE ONLY REAL
EXPANDING CONDUCTOR.
THE IRWIN & REBER
PATENT
EXPANDING WATER CONDUCTOR.
MANUFACTURED BY THE
S. S. S. Conductor Co.
LIMITED,
163 Lacock Street,
ALLEGHENY, PA.

THE STANDING SEAM allows of an easy and secure fastening, keeping the pipe far enough from the wall to make any overflow from the eave pipe or head, run down the spout, and not the wall; and will open, in case of freezing, so as to prevent bursting, and still remain double-locked and water-tight.

Made in 6-foot lengths, in a single sheet of
SOFT STEEL,
Either Galvanized, Kalameined or Leaded.
AGENTS FOR NEW ENGLAND STATES.
E. B. BADGER & SON.
Coppersmiths & Galvanized Iron Workers.
Nos. 63 & 65 Pitts St.,
BOSTON, MASS.

Best Conductor of all.
RITCHIE'S
Corrugated Expanding
Conductor.

Guaranteed no Infringement.

This pipe has all the advantages of other corrugated conductors in not bursting from freezing, and in addition:

It has no soldered joints.

The enlarged coupling makes the conductor of even size inside throughout.

It is galvanized, after formation, great care being taken to secure a smooth coating of zinc free from dross and impurities.

MANUFACTURED BY
LAMB & RITCHIE,
Boston Spiral Tube Works,
CAMBRIDGEPORT, MASS.

AESCHLIMANN & PELLARIN,
Successors to J. PASQUALI & C. AESCHLIMANN.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can "*press the button,*"—*we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

The Eastman Dry Plate and Film Co.,
ROCHESTER, N. Y.

Include them in your Specifications.
THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)
The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.
Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.

MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.

The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vanderbilt and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

Cambridge, Mass.—*North Ave.*, frame dwell., 43′ x 57′ owner, Chas. F. Goodridge; contract to be let; architects, Van Brunt & Howe, Boston and Kansas City; superintending architect, Samuel J. Brown, Boston.

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

COMPETITION.

MUNICIPAL BUILDINGS.
[At New York, N. Y.]

NEW YORK, N. Y., April 22, 1889.

NOTICE TO ARCHITECTS.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 20th day of June, 1889,** for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller,
WALTON STORM, Chairman Finance Committee, Board of Aldermen.
} Committee Commissioners of the Sinking Fund.

703

PROPOSALS.

CHAPEL AND BARN.
[At Xenia, O.]

OFFICE OF THE SUPERINTENDENT, OHIO SOLDIERS' AND SAILORS' ORPHANS' HOME, XENIA, O., April 29, 1889.

Sealed proposals will be received at the office of the Superintendent of the Ohio Soldiers' and Sailors' Orphans' Home, near Xenia, O., **up to 12 o'clock (noon) of the 28th day of May, 1889,** for performing the labor and furnishing the materials necessary for enlarging the chapel at said Home, in accordance with plans and specifications on file in this office, to be open for public inspection from and after May 4, to May 28, 1889, inclusive.

Separate and distinct proposals to be made for each separate and distinct kind of labor necessary in doing the work.

Also, at the same time and place, sealed proposals will be received for performing the labor and furnishing the materials necessary to the erection of a barn according to plans and specifications on file in this office and open for public inspection from and after May 4, to May 28, inclusive, except that said Ohio Soldiers' and Sailors' Orphans' Home has 106,000 (one hundred and six thousand) bricks; forty (40) perch of stone for foundation, and the following bill of lumber:

3,663 ft. Norway.	10 8x8–10.
5,600 ft. white pine.	1 8x8–14.
228 2x8–26.	58 2x6–20.
33 2x12–20.	4 4x6–16.
33 2x12–16.	33 2x4–16.
69 2x12–12.	16 2x8–16.
4 3x4–28.	

Which are to be used in the construction of said barn by the contractor or contractors.

The contractor or contractors to furnish all the labor and all *other* materials except the above *specified* materials, necessary to the erection of said barn.

Separate and distinct bids to be made for each separate and distinct trade and kind of labor necessary in doing the work.

Bids must be accompanied by a bond of the proposer with sufficient sureties conditioned that if the proposal be accepted the party proposing will enter into a proper contract, and faithfully perform his or their contract or contracts in accordance with said proposal and the plan or plans, specifications and descriptions which are a part of such contract or contracts.

All bids must be addressed to the undersigned and indorsed "Proposals for Enlarging Chapel and Building Barn."

NOAH THOMAS,
Superintendent.

May 17, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 7th day of June, 1889, for all the labor and materials required to fix in place complete a low pressure, return-circulation, steam-heating and ventilating apparatus for the Court-House, Post-Office, etc., building at Oshkosh, Wis., in accordance with the drawings and specification, copies of which may be had on application at this office and the office of the Superintendent. The drawings and specification may be seen at the Builders' and Traders' Exchange, Chicago, Ill. Each bid must be accompanied by a certified

Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe

HANDHOLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

THE

MANSFIELD COMPRESSED LEAD TRAP.

SAFEST IN ACTION.
CHEAPEST IN ECONOMY.
Requires no Ventilation.

This style of trap is endorsed by *Architects* and *Physicians* generally, as the safest in the market to prevent *Sewer Gas* from entering the house. It also has no mechanical devices to get out of order, which is a very important point.

Manufactured only by the

BOSTON and LOCKPORT BLOCK CO.,

162 Commercial St., Boston, Mass.

For sale by the Plumbers' Trade generally Where not found, a sample trap will be sent, Express prepaid. Price, $2.00.

PROPOSALS.

check for $500, drawn to the order of the Treasurer of the United States. JAMES H. WINDRIM, Supervising Architect. 700

May 17, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 7th day of June, 1889, for the alterations and repairs required in the United States Custom-House building at Cleveland, O., in accordance with the drawings and specifications, copies of which may be had on application at this office and the office of the Superintendent. The drawings and specification may be seen at the Builders' and Traders' Exchange, Chicago, Ill. Each bid must be accompanied by a certified check for $500, drawn to the order of the Treasurer of the United States. JAMES H. WINDRIM, Supervising Architect. 700

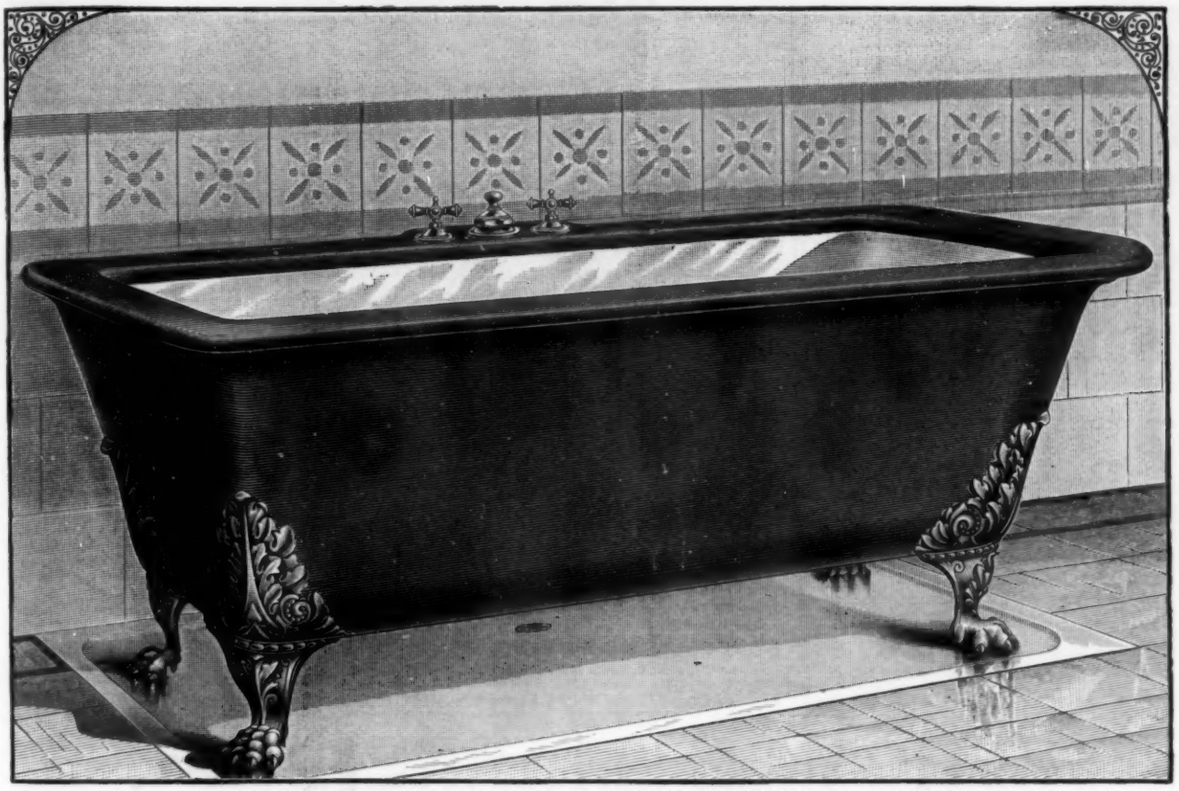
PROPOSALS.

May 17, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 11th day of June, 1889, for the labor and materials required in the erection and completion of the iron roof, etc., for the United States Court-House and Post-Office building at Pittsburgh, Pa., in accordance with the drawings and specification, copies of which may be obtained on application at this office, and the office of the Superintendent. The drawings and specification may also be seen at the Builders' Exchange, Cincinnati, O.; Builders' and Traders' Exchanges at Chicago, Ill., and Louisville, Ky., and Engineers' Society of Western Pennsylvania, Pittsburgh, Pa. Each bid must be accompanied by a certified check for $500. JAMES H. WINDRIM, Supervising Architect. 700

THE J. L. MOTT IRON WORKS.

88 and 90 BEEKMAN STREET, NEW YORK.

and 311 and 313 WABASH AVE., CHICAGO, ILL.



Copyright, 1888, by The J. L. MOTT IRON WORKS.—Plate 29-G.

Porcelain-lined Roman Bath, with Supply Fittings and "Unique" Waste, and Bronzed Iron, Polished or Nickel-plated Cast Brass Legs and Hardwood or Cast Brass Rim. The Roman Bath is the outcome of the growing desire to have plumbing appliances set up without any, or at least very little, cabinet work; for this purpose the Roman Bath is well adapted, as it renders unnecessary the exposure of the pipes and fittings and is very artistic and symmetrical. The fittings, being at the back of the tub, can be easily reached by the bather.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

26 South Third Street, Philadelphia, Pa.

DEXTER BROTHERS'

English Shingle Stain.

A. B. RICH, Agent, Office, D. B. Crockett Co., 84 William St., N. Y.

FELTON, RAU & SIBLEY, Agents, Philadelphia, Pa.

H. M. HOOKER, Agent, 57 W. Randolph St., Chicago, Ill.

OUR STAINS are made from the best English Colors and pure Linseed oil with preserving ingredients. They do not contain any "*gas oil*" or "*dead oil*" which has the smell of *Creosote*, and we guarantee that all our samples have been dipped in our original stain.

WE CLAIM superiority of color which will not wash off and will retain its brightness long after other stains have faded or turned black. Our Stain has been thoroughly tested by many of the leading Architects in this country during the past four or five years, and we have received many flattering testimonials. We will send a package of Stained Boards, by mail, to any address, on application. These small Sample Boards give but an imperfect idea, however, of the beauty of the Stain, as the effect of Stained Shingles can only be seen in a mass on the house.

ONE GALLON OF OUR STAIN will dip about 500 Shingles, or cover about 1500 shingles, when brushed on. Please note number on Sample Boards. We would advise Architects to specify as follows:

"DEXTER BROTHERS' ENGLISH SHINGLE STAIN."

DEXTER BROTHERS,

SOLE MANUFACTURERS,

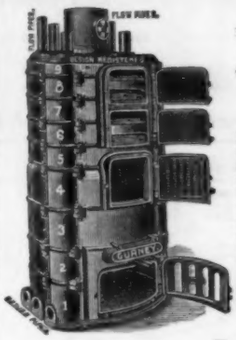
HOT WATER HEATER.



More extensively used and with better results than any other Hot Water Heater.

OFFICE OF SHERMAN & JENNE, *Ins. and R. E. Agents.*

BRATTLEBORO, VT., March 7, 1889.

"I have now been using the Gurney Hot Water Heater for several months. I have been able to secure very uniform and sufficient heat for 8 rooms and large upper and lower halls in my dwelling house, and am very much pleased with its performance. You have been very prompt, courteous and generous in your dealings with me, and I have no doubt you treat all customers in the same manner. With your heater and proper piping and radiators almost any desired results may be procured and I consider the plan of heating very effective and economical."

Signed, L. H. SHERMAN.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can *"press the button,"—we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

ROCHESTER, N. Y.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.

MADE ONLY BY

THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.

The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vancornlear and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.

Lindeman Liquid Filler

Somers, Lindeman & Co.,
NEW YORK,
281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

(Established 1852.)
Fulton St., cor. William, New York.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

CABOT'S BRICK-PRESERVATIVE

THIS IS A PECULIAR COMBINATION OF INDESTRUCTIBLE GUMS WITH AN OILY SOLVENT WHICH PREVENTS THE PENETRATION OF WATER INTO EITHER BRICKS OR MORTAR: IT GREATLY IMPROVES THE APPEARANCE OF BRICK-WORK, GIVING IT A RICH EFFECT, FREE FROM GLOSS: THE WHITE EFFLORESCENCE OF SALTS ON THE SURFACE AND THE FORMATION OF FUNGUS IS PREVENTED: AS IT IS MUCH MORE IMPERMEABLE TO WATER IT IS FAR BETTER THAN LINSEED OIL, AND IT IS NOT DESTROYED BY THE LIME OF THE MORTAR: WE CAN RECOMMEND IT FOR USE ON CHIMNEYS, AS IT WILL PREVENT THEIR DISINTEGRATION BY DRIVING RAINS, WHILE SUPERIOR TO THE BEST PAINT FOR THIS PURPOSE, IT IS ALSO MORE ECONOMICAL:

HELIOTYPE PRINTING CO.

211 TREMONT ST. BOSTON

MOST APPROVED

PHOTO-MECHANICAL
PHOTO-LITHOGRAPHIC
& PHOTO-ENGRAVING
PROCESSES

COPIES OF ARCHITECTURAL, MECHANICAL, & OTHER DRAWINGS, MAPS, DIAGRAMS, ARTISTIC PROGRAMMES, MENU CARDS, ETC. ETC.

ESTIMATES FURNISHED ON APPLICATION

HELIOTYPE PRINTING CO.

Are you aware

THAT The old standard weights of Roofing Plates were 112 lbs. per box IC 14 x 20, and 224 lbs. per box IC 20 x 28 — 112 sheets per box?

Are you aware

THAT Severe competition and a desire for low-priced plates caused those weights to fall to 108 and 216 lbs., respectively?

Are you aware

THAT Most of the so-called extra coated Roofing Plates to-day do not weigh over 110 lbs. per box IC 14 x 20, and 220 lbs. per box IC 20 x 28?

Are you aware

THAT It is nevertheless claimed for many of these brands that they carry 20 lbs. of coating per box of 14 x 20, and 40 lbs. per box of 20 x 28?

Are you aware

THAT The claim by some that certain Brands of Roofing Plates carry 20 lbs. of coating is entirely disproved by the fact that such plates do not weigh over 110 lbs. per box IC 14 x 20, while the standard weight for ordinary Roofing Plates is 108 lbs. for same size and gauge?

Are you aware

THAT We guarantee the "GILBERTSON'S OLD METHOD" Extra Coated Roofing Plates to average not less than 120 lbs. net per box IC 14 x 20, and 240 lbs. per box IC 20 x 28?

Are you aware

THAT We guarantee the coating to be from 18 to 20 lbs. per box for the 14 x 20, and 36 to 40 lbs. per box for 20 x 28?

Are you aware

THAT The above facts show the impossibility of placing the "GILBERTSON'S OLD METHOD" on the same level as other old style plates, either as regards price or quality?

COMPETITION.

MUNICIPAL BUILDINGS.
[At New York, N. Y.]
NEW YORK, N. Y., April 22, 1889.
NOTICE TO ARCHITECTS.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 30th day of June, 1889,** for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller,
WALTON STORM, Chairman Finance Committee, Board of Aldermen.
} Committee Commissioners of the Sinking Fund.

PROPOSALS.

PROPOSALS FOR CUT-GRANITE. Office of Building for Library of Congress, 145 Capitol Street, Washington, D. C., May 25, 1889. Sealed proposals for furnishing and delivering all of the cut-granite required for the front walls, including the dome of the rotunda of the Building for the Library of Congress, in this city, will be received at this office until 2 o'clock P. M., on Saturday, the 29th day of June, 1889, and opened immediately thereafter in presence of bidders. The granite must be of light bluish gray color, and fine grain. Specifications, general instructions and conditions, and blank forms of proposal may be obtained on application at this office. BERNARD R. GREEN, Superintendent and Engineer. 704

May 23, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 18th day of June, 1889, for all the labor and material required to build and complete the stone and brick masonry of walls of superstructure of the United States Post-Office, etc., building at Dayton, O., in accordance with drawings and specification, copies of which may be had on application at this office or the office of the Superintendent. The drawings and specification may be seen at the Builders' and Traders' Exchange, Chicago, Ill., and the Builders' and Dealers' Exchange Company, Cleveland, O. Bids must be accompanied by a certified check for $500. JAMES H. WINDRIM, Supervising Architect. 701

May 23, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 18th day of June, 1889, for the labor and materials required for the improvement of the grounds of the United States Marine Hospital at Lake View, Chicago, Ill., in accordance with the drawing and specification, copies of which may be had on application at this office and the office of the Superintendent of the Appraisers Stores, Chicago, Ill. Each bid must be accompanied by a certified check for $200. JAMES H. WINDRIM, Supervising Architect. 701

May 24, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M., on the 13th day of June, 1889, for furnishing and putting in place complete in the United States Court-House and Post-Office at Des Moines, Iowa, two hydraulic passenger elevators, in accordance with the drawings and specification, copies of which may be had on

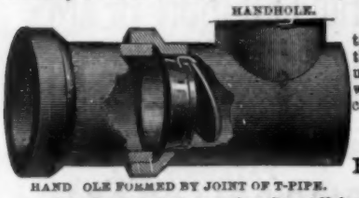
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HAND OLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an Iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

"THE CAST SINK MUST GO."

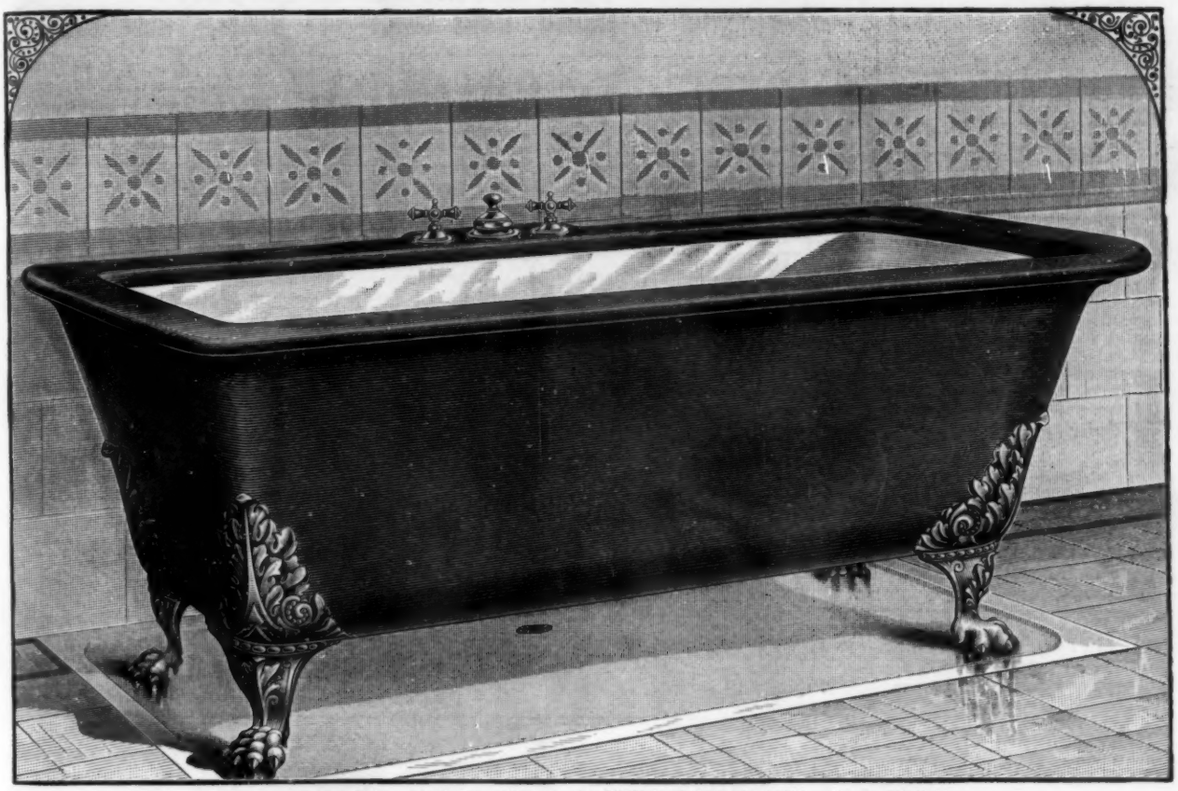
and 311 and 313 WABASH AVE., CHICAGO, ILL.



Copyright, 1888, by The J. L. MOTT IRON WORKS.—Plate 29-G.

Porcelain-lined Roman Bath, with Supply Fittings and "Unique" Waste, and Bronzed Iron, Polished or Nickel-plated Cast Brass Legs and Hardwood or Cast Brass Rim. The Roman Bath is the outcome of the growing desire to have plumbing appliances set up without any, or at least very little, cabinet work; for this purpose the Roman Bath is well adapted, as it renders unnecessary the exposure of the pipes and fittings and is very artistic and symmetrical. The fittings, being at the back of the tub, can be easily reached by the bather.

Cements.

Hanover Portland Cement,

The Highest Grade Imported exclusively by
BAETJER & MEYERSTEIN, 5 Dey St. NEW YORK.
Over 100,000 barrels of our Cement were used in the construction of the magnificent Ponce de Leon Hotel, and other buildings, at ST. AUGUSTINE, Florida.
Also Importers of German Rock Asphalte Mastic.

THE BROOKLYN BRIDGE RESTS ON NORTON'S CEMENT.

{ The Trustees of the New York and Brooklyn Bridge, Brooklyn, August 9, 1883.

Mr. F. O. NORTON,
Dear Sir:

During the construction of the New York and Brooklyn Bridge upwards of 100,000 barrels of your cement were used. The concrete with which the caissions were filled was made with your Cement, and the entire weight of the towers rests upon it.

Your Cement has always had the preference at the same price other cements were offered for, and during part of the time in important parts of the work it was selected, even at a higher price, on account of its superiority, especially in the points of uniformity of quality and fineness.

Without hesitation I can recommend your Cement to those desiring a good and reliable article. Very truly yours,
C. C. MARTIN,
Chief Engineer and Superintendent.

F. O. NORTON,
92 Broadway, NEW YORK.

Stettin And other First-Class Brands of ENGLISH & FRENCH Portland Cement

Send for Descriptive Pamphlet and Copies of Tests.
ERSKINE W. FISHER, Welles Building, 18 Broadway, NEW YORK.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

DEXTER BROTHERS,

SOLE MANUFACTURERS,

55 & 57 Broad St., - BOSTON, MASS.

THE "COMFORT" BLIND FASTENER.

PATENT APPLIED FOR.

THE "Comfort" Blind Fastener, as illustrated in the above cut, is intended to simplify the opening and closing of blinds. By the use of this Fastener, the necessity of leaning out of window is dispensed with, which of itself is a very great advantage, especially in stormy weather.

There is, also, no possibility of the blinds being lifted from their hangings where the "Comfort" Fastener is used.

It can be readily attached to any blind at an expense very trifling when compared with the advantages it possesses.

Manufactured and for sale by

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes **INSIDE WORK,** Requiring extreme durability, use No. 2 ELASTICA FINISH.

For **OUTSIDE WORK,** Requiring extreme durability, use No. 1 ELASTICA FINISH

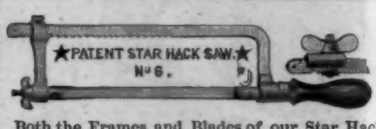
F. C. MOORE, PRESIDENT.

CYRUS PECK, Vice President and Secretary.

Agencies throughout the United States.



Both the Frames and Blades of our Star Hack Saws are now as perfect as human skill can make them. The Frame is steel, polished and Nickel plated, and will hold all blades from 8 to 12 inches, and face them in four directions. With the extra clamp, as seen in the cut, all broken Blades can be used. These Saws have a file temper, and one five cent Blade will cut iron or soft steel steadily for several hours, doing more work than a dollar's worth of files.

Price of No. 6 Frame	$1 00
" " Clamp	0 10
" " Blades per doz. 55c 60c 65c 70c 85c 95c	$1 05
Inches long 6 7 8 9 10 11 12	

Frame, Blades or Clamp, sent by mail pre paid on receipt of price. Also for sale by all Hardware Dealers. All goods bearing our name are fully warranted.

SURVIVING PARTNERS OF KNISELY & MILLER BROS.

SLATE · TIN & IRON ROOFERS ·

129-131 SOUTH CLINTON ST.
CHICAGO

MANUFACTURERS OF
GALVANIZED IRON CORNICES
THE HAYES PATENT SKYLIGHTS.
CORRUGATED IRON FOR ROOFING, ETC.
CONDUCTOR PIPE.

WILL be pleased to figure with Architects, Owners, or other persons having work to let, for large jobs of work in our line in any part of the United States; our resources of capital, experience, etc., being such that large jobs are particularly attractive to us, and we can often do them cheaper than other firms of inferior resources; particular attention being given to first-class work.

We make a specialty of roofing in slate, tile, copper, tin and corrugated iron, and think we are fully posted as to the best ways of doing such work, and that we can do it as cheaply as any one for equal quality of work.

We are also fully equipped for making **skylight work in all its various forms,** having the best machinery and an extensive experience.

This is also true of **corrugated-iron roofing, siding and ceiling.** We have a full equipment for painting and corrugating iron, and for making standing-seam and V-crimped roofing, carrying at all times a large stock of material for this purpose.

Are selling to the trade our **round and square corrugated expanding conductor pipes** so cheaply that no well posted Architect can afford to use the plain pipes.

For galvanized-iron work, copper bays, etc., etc., we have as good workmen as can be had; we pay close attention to getting out such work and in, good shape, and try to, and think we do, give good satisfaction. A new feature with us this year will be that all sheet metal for such purposes will be crimped; which largely prevents that wavy appearance that is objectionable in such work.

JAMES A. MILLER & BRO.

GLOBE VENTILATORS & CHIMNEY CAPS.

Public and Private Buildings and Railroad Cars Perfectly Ventilated. Smoky Chimneys Cured. Stationary, Ornamental, Noiseless, Storm-proof. Durable, Simple, and Cheap.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can "*press the button,*"—*we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

The Eastman Dry Plate and Film Co.,

Include them in your Specifications.
THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)
The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.
Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the
EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.

MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.

The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vancornlear and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave.

Lindeman Liquid Filler

Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

CABOT'S BRICK-PRESERVATIVE

THIS IS A PECULIAR COMBINATION OF INDESTRUCTIBLE GUMS WITH AN OILY SOLVENT WHICH PREVENTS THE PENETRATION OF WATER INTO EITHER BRICKS OR MORTAR: IT GREATLY IMPROVES THE APPEARANCE OF BRICK-WORK, GIVING IT A RICH EFFECT, FREE FROM GLOSS: THE WHITE EFFLORESCENCE OF SALTS ON THE SURFACE AND THE FORMATION OF FUNGUS IS PREVENTED: AS IT IS MUCH MORE IMPERMEABLE TO WATER IT IS FAR BETTER THAN LINSEED OIL, AND IT IS NOT DESTROYED BY THE LIME OF THE MORTAR: WE CAN RECOMMEND IT FOR USE ON CHIMNEYS, AS IT WILL PREVENT THEIR DISINTEGRATION BY DRIVING RAINS, WHILE SUPERIOR TO THE BEST PAINT FOR THIS PURPOSE, IT IS ALSO MORE ECONOMICAL:

A SUGGESTION.

ARCHITECTS AND BUILDERS

Don't specify simply old style tin when wanting the ***best that can be made.*** Have the specifications read as follows: "The Genuine Taylor 'Old Style' **Brand** Roofing Tin, guaranteed by N. & G. Taylor Co., Philadelphia; every sheet stamped with brand, thickness, trade mark, and their name."

This Tin properly put on and taken care of will last as long as the building.

Tucker St., near Lauriat Ave., Ward 24, frame dwell., 22' x 40'; owner, S. A. Tucker; builder, W. McLaughlin.

Unnamed St., off Baker St., near Gardner St.,

PAINTING. * * *

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

COMPETITION.

MUNICIPAL BUILDINGS.

[At New York, N. Y.]

New York, N. Y., April 22, 1889.

Notice to Architects.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 20th day of June, 1889**, for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller,
WALTON STORM, Chairman Finance Committee, Board of Aldermen. } Committee Commissioners of the Sinking Fund.

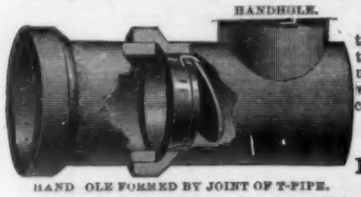
Sanitary Appliances

Protect yourselves against Sewer Gas and Back Water by using

The Palmer Pat. Sanitary Sewer-Trap or Safety-Valve.

Manufactured by THE ERIE CITY FOUNDRY, ERIE, PA.

Infinitely superior to any "Water Trap" ever made. Sizes for 3, 4, 6, 8, and 9 in. pipe



HAND OLE FORMED BY JOINT OF T-PIPE.

This cut represents our House-Connection Valve set in the hub end of a piece of clay pipe. By trimming off the flange of the valve, a very easy matter, it can be used in iron pipe as well. It is made of indestructable white composition metal which can not rust. Valve cannot fail to act.

Descriptive Circular sent on application.

For Sale by all Dealers in Plumbers' Supplies.

We also manufacture an iron Street Valve in two sizes, viz: 10 in. by 15 in., and 18in. by 18 in.

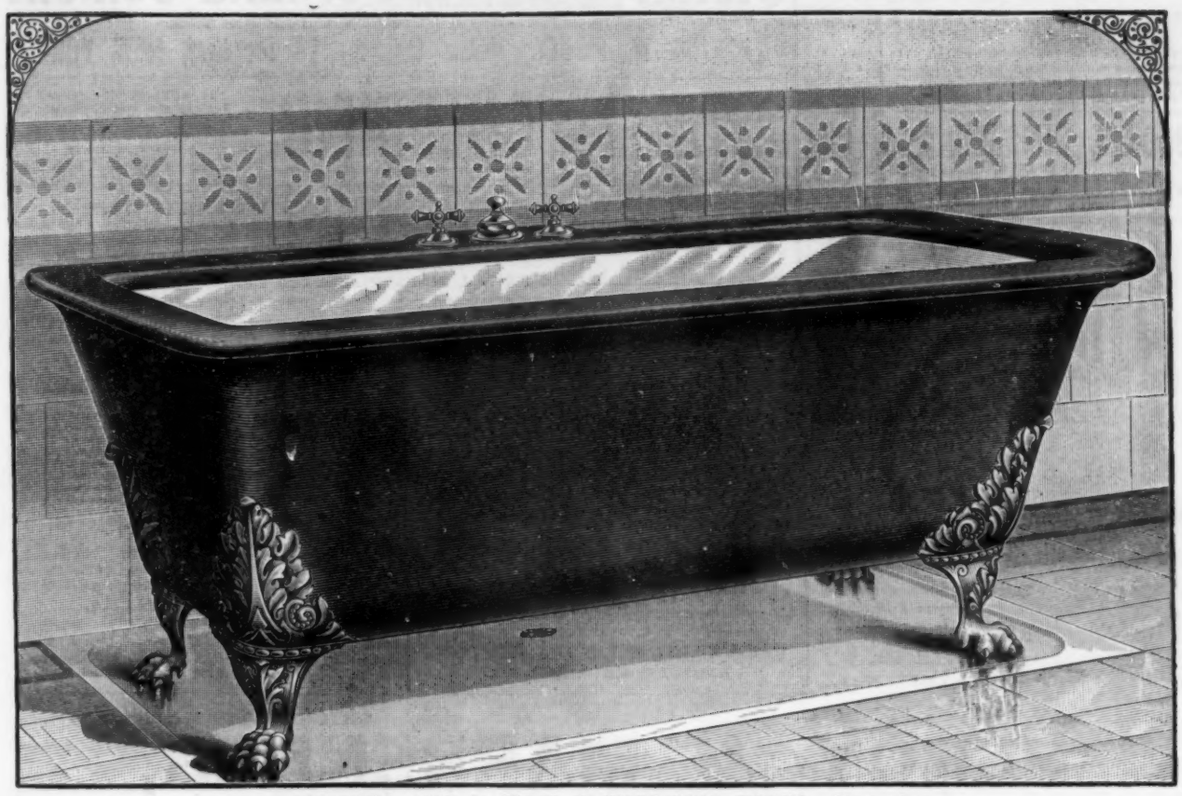
THE J. L. MOTT IRON WORKS.

88 and 90 BEEKMAN STREET, NEW YORK.
and 311 and 313 WABASH AVE., CHICAGO, ILL.



Copyright, 1888, by The J. L. MOTT IRON WORKS.—Plate 29-G.

Porcelain-lined Roman Bath, with Supply Fittings and "Unique" Waste, and Bronzed Iron, Polished or Nickel-plated Cast Brass Legs and Hardwood or Cast Brass Rim. The Roman Bath is the outcome of the growing desire to have plumbing appliances set up without any, or at least very little, cabinet work; for this purpose the Roman Bath is well adapted, as it renders unnecessary the exposure of the pipes and fittings and is very artistic and symmetrical. The fittings, being at the back of the tub, can be easily reached by the bather.

AKRON, OHIO.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

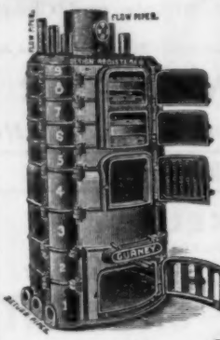
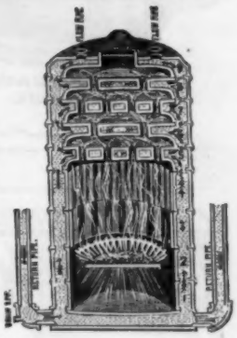
HOT WATER HEATER.



More extensively used and with better results than any other Hot Water Heater.



OFFICE OF SHERMAN & JENNE, *Ins. and R. E. Agents.*

BRATTLEBORO, VT., March 7, 1889.

"I have now been using the Gurney Hot Water Heater for several months. I have been able to secure very uniform and sufficient heat for 8 rooms and large upper and lower halls in my dwelling house, and am very much pleased with its performance. You have been very prompt, courteous and generous in your dealings with me, and I have no doubt you treat all customers in the same manner. With your heater and proper piping and radiators almost any desired results may be procured and I consider the plan of heating very effective and economical."

Signed, L. H. SHERMAN.

TO ARCHITECTS AND CONTRACTORS:

We desire to call your attention to the Superior quality of **Plate Glass manufactured by the**

PITTSBURGH PLATE GLASS CO.

The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.

The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed**, besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.

We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.

With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

5774 GERMANTOWN AVE., PHILADELPHIA, PA.

Sanitary Chemistry.
STEPHEN P. SHARPLES,
13 BROAD STREET, BOSTON, MASS.

Strength of Materials.
EDWARD A. BUSS,
MILL ENGINEER 85 WATER STREET, BOSTON, MASS.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can "*press the button,*"—*we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

The Eastman Dry Plate and Film Co.,
ROCHESTER, N. Y.

Include them in your Specifications.
THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)
The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.
Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the
EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.

MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.
The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal; Vanderbilt and Florence Flats, New York; Borcel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.

Lindeman Liquid Filler

Somers, Lindeman & Co.,
NEW YORK,
281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

(Established 1852.)
Fulton St., cor. William, New York.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

INVALUABLE TO ARCHITECTS.

Safe Building.

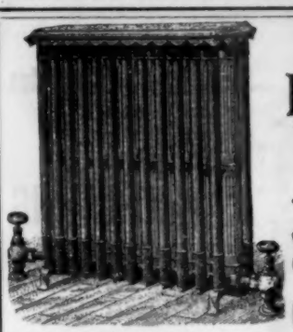
BY LOUIS De COPPET BERG.

Series I. Square 8vo. Illustrated with numerous formulæ, diagrams and tables. . $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor-of-safety, centre of gravity, neutral axis, moment of inertia, etc. There follows a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses spires, masonry, girders, inverted and floor-arches, sidewalks, stairs, chimneys, etc."

These papers are the work of a practising architect, and not of a mere bookmaker or theorist. Mr. Berg, aiming to make his work of the greatest value to the largest number, has confined himself in his mathematical demonstrations to the use of arithmetic, algebra, and plane geometry. In short these papers are in the highest sense practical and valuable.

TICKNOR AND COMPANY, Boston.



The "Union" Radiator.

The H. B. SMITH CO.,
MANUFACTURERS OF
HEATING APPARATUS
Steam and Water
For Public Buildings and Private Residences.
SPECIALTIES:

CABOT'S BRICK PRESERVATIVE

THIS IS A PECULIAR COMBINATION OF INDESTRUCTIBLE GUMS WITH AN OILY SOLVENT WHICH PREVENTS THE PENETRATION OF WATER INTO EITHER BRICKS OR MORTAR: IT GREATLY IMPROVES THE APPEARANCE OF BRICK-WORK, GIVING IT A RICH EFFECT, FREE FROM GLOSS: THE WHITE EFFLORESCENCE OF SALTS ON THE SURFACE AND THE FORMATION OF FUNGUS IS PREVENTED: AS IT IS MUCH MORE IMPERMEABLE TO WATER IT IS FAR BETTER THAN LINSEED OIL, AND IT IS NOT DESTROYED BY THE LIME OF THE MORTAR: WE CAN RECOMMEND IT FOR USE ON CHIMNEYS, AS IT WILL PREVENT THEIR DISINTEGRATION BY DRIVING RAINS, WHILE SUPERIOR TO THE BEST PAINT FOR THIS PURPOSE, IT IS ALSO MORE ECONOMICAL:

ESTIMATES FURNISHED ON APPLICATION

HELIOTYPE PRINTING CO

Are you aware

THAT The old standard weights of Roofing Plates were 112 lbs. per box IC 14 x 20, and 224 lbs. per box IC 20 x 28 — 112 sheets per box?

Are you aware

THAT Severe competition and a desire for low-priced plates caused those weights to fall to 108 and 216 lbs., respectively?

Are you aware

THAT Most of the so-called extra coated Roofing Plates to-day do not weigh over 110 lbs. per box IC 14 x 20, and 220 lbs. per box IC 20 x 28?

Are you aware

THAT It is nevertheless claimed for many of these brands that they carry 20 lbs. of coating per box of 14 x 20, and 40 lbs. per box of 20 x 28?

Are you aware

THAT The claim by some that certain Brands of Roofing Plates carry 20 lbs. of coating is entirely disproved by the fact that such plates do not weigh over 110 lbs. per box IC 14 x 20, while the standard weight for ordinary Roofing Plates is 108 lbs. for same size and guage?

Are you aware

THAT We guarantee the "GILBERTSON'S OLD METHOD" Extra Coated Roofing Plates to average not less than 120 lbs. net per box IC 14 x 20, and 240 lbs. per box IC 20 x 28?

Are you aware

THAT We guarantee the coating to be from 18 to 20 lbs. per box for the 14 x 20, and 36 to 40 lbs. per box for 20 x 28?

Are you aware

THAT The above facts show the impossibility of placing the "GILBERTSON'S OLD METHOD" on the same level as other old style plates, either as regards price or quality?

MUNICIPAL BUILDINGS.

[At New York, N. Y.]

New York, N. Y., April 22, 1889.

Notice to Architects.

In accordance with the provisions of Chapter 371 of the Laws of 1887, entitled "An act to provide for the erection of a building for criminal courts and other purposes in the city of New York," the Commissioners of the Sinking Fund will receive plans, specifications and estimates of cost **until the 20th day of June, 1889,** for the building provided for in the said act, to be erected on the block bounded by Centre and Elm and White and Franklin Streets.

The plans, estimates and specifications to be submitted are described in a paper entitled "Instructions to Architects," which can be obtained on application at the Comptroller's office.

These "Instructions" will also contain a diagram

COMPETITION.

of the plot on which the building is to be erected, showing location, dimensions, etc.

The architect whose plan, estimate and specification shall be approved and accepted by the Commissioners will be appointed architect for the construction of the building, and be paid for his services in superintending the work the fees prescribed by the American Institute of Architects, provided his standing is such as to guarantee a faithful discharge of his duties.

Each set of plans, estimates and specifications submitted shall be marked with such assumed designation as the architect may select, provided there shall be filed with the Mayor a sealed envelope giving the real name of the competitor, which will not be opened until the selection shall have been made.

THEO. W. MYERS, Comptroller,
WALTON STORM, Chairman Finance Committee, Board of Aldermen.
} Committee Commissioners of the Sinking Fund.

PROPOSALS.

SEWERS. [At Westfield, Mass.]

OFFICE OF SELECTMEN, TOWN-HALL,
WESTFIELD, MASS., June 5, 1889.

Sealed proposals for building from 12,000 to 20,000 feet of sewers will be received at this office, Town-Hall, Westfield, **until 2 P. M. of June 20, 1889.**

Each bid must be signed by the bidder, and be accompanied by a bond of $500, conditioned for the execution of the contract (with satisfactory sureties for its performance) within the time specified in this advertisement, in case the bid is accepted.

No bid will be considered which has not responsible sureties on its accompanying bond.

The person or persons to whom the contract may be awarded will be required to appear at this office with the sureties offered by him or them, and execute the contract within four secular days from the date of notification of such award, and the preparation and readiness for signature of the contract. And, in case of the failure or neglect to do so, he or they will be considered as having abandoned it, and the amount of the bond will be forfeited to the town of Westfield.

The amount of security required will be such sum as may be fixed by the Selectmen after the proposals are opened, said sum to be not less than one-third, or more than two-thirds, of the amount of the contract.

Printed specifications for doing the work, with blank forms for proposals and bond to accompany proposal, and any further information, can be obtained at the office of the Selectmen, Town-Hall.

The Selectmen reserve the right to reject any or all bids, or any part of any or all bids.

Proposals must be indorsed "Proposals for Building Sewers," and addressed to

W. C. CLARK,
Chairman Selectmen.

703

COURT-HOUSE. [At Pottsville, Pa.]

The undersigned will receive bids **until June 20th, 1889,** for stone and brick.

Also for iron beams and girder work.

Also for all stone masonwork by lump bid.

Also for all brickwork by lump bid.

All bids to be F. O. B. at Pottsville, or delivered at the Court-house.

Plans and specifications can be seen at the Court-house. Address all communications to

703 R. B. TAYLOR, Pottsville, Pa.

PROPOSALS.

June 10th, 1889. Sealed proposals will be received at the office of the Supervising Architect, Treasury Department, Washington, D. C., until 2 o'clock P. M. on the 2d day of July, 1889, for all the stone and brick work required to complete the basement and area walls of the United States Court-house, Post-office, etc., building at Savannah, Ga., including concrete footings and drainage, in accordance with the drawings and specifications, copies of which may be had on application at this office and the office of the Superintendent. The specification and drawings may also be seen at the office of the Builders' and Dealers' Exchange, Charleston, S. C.; Builders' and Traders' Exchange, Chicago, Ill.; and the Builders' Exchange at Baltimore, Md. Each bid must be accompanied by a certified check for $500. JAS. H. WINDRIM, Supervising Architect. 703

JAIL. [At Sullivan, Ind.]

Up to 3 o'clock P. M., of the 21st day of June, 1889, sealed proposals will be received by the Auditor of Sullivan County, Ind.

Printed notice to contractors furnished on application to Wm. Willis, Auditor of Sullivan County, Ind.

Bids will be received for the erection of the jail and jailor's residence complete, also upon the following subdivisions thereof separately, viz.:

1. For all ironwork placed in building complete.
2. For all stonework and concrete complete.
3. For steam-heating and plumbing complete.
4. For all excavating, grading, brickwork, carpenter work, plastering, galvanized-iron, tin, slate work and painting and all other work necessary to complete the job, not particularly specified and designed in items 1, 2 and 3 as above set out.

Plans and specifications may be seen at the office of the Auditor of Sullivan County, Ind., or at the office of J. W. Gaddis, architect, Vincennes, Ind.

A bond will be required to accompany such bid in the penal sum of $5,000, payable to the State of Indiana signed by at least two resident free-hold sureties.

The Board reserves the right to reject any and all bids.

CHARLES SCOTT,
JAMES L. NASH,
HARRISON PITTMAN,
} Board of Commissioners.

703

TERRA-COTTA PIPE. [At Washington, D. C.]

OFFICE OF THE COMMISSIONERS, D. C.,
WASHINGTON, D. C., May 29, 1889.

Sealed proposals will be received at this office **until 12 o'clock M., on Saturday, June 22, 1889.** 1,000 feet 8-inch terra-cotta pipe; 175 feet of 8 x 6-inch terra-cotta Y branches; 45,000 feet 12-inch terra-cotta pipe; 6,000 feet 12 x 6-inch terra-cotta Y branches; 9,000 feet 15-inch terra-cotta pipe; 1,500 feet 15 x 6-inch terra-cotta Y branches; 7,500 feet 18-inch terra-cotta pipe; 1,200 feet 18 x 6-inch terra-cotta Y branches; 1,000 feet 21-inch terra-cotta pipe; 150 feet 21 x 6-inch terra-cotta Y branches; 6,800 feet 24-inch terra-cotta pipe; 600 feet 24 x 6-inch terra-cotta Y branches; 1,000 feet 6-inch terra-cotta pipe.

Blank forms of proposals and specifications can be obtained at this office upon application therefor, together with all necessary information, and only bids upon these forms will be considered.

The right is reserved to reject any and all bids or parts of bids.

J. W. DOUGLASS,
L. G. HINE,
C. W. RAYMOND,
Commissioners, D. C.

703

PROPOSALS.

THE J. L. MOTT IRON WORKS,

88 and 90 BEEKMAN STREET, NEW YORK.

and 311 and 313 WABASH AVE., CHICAGO, ILL.

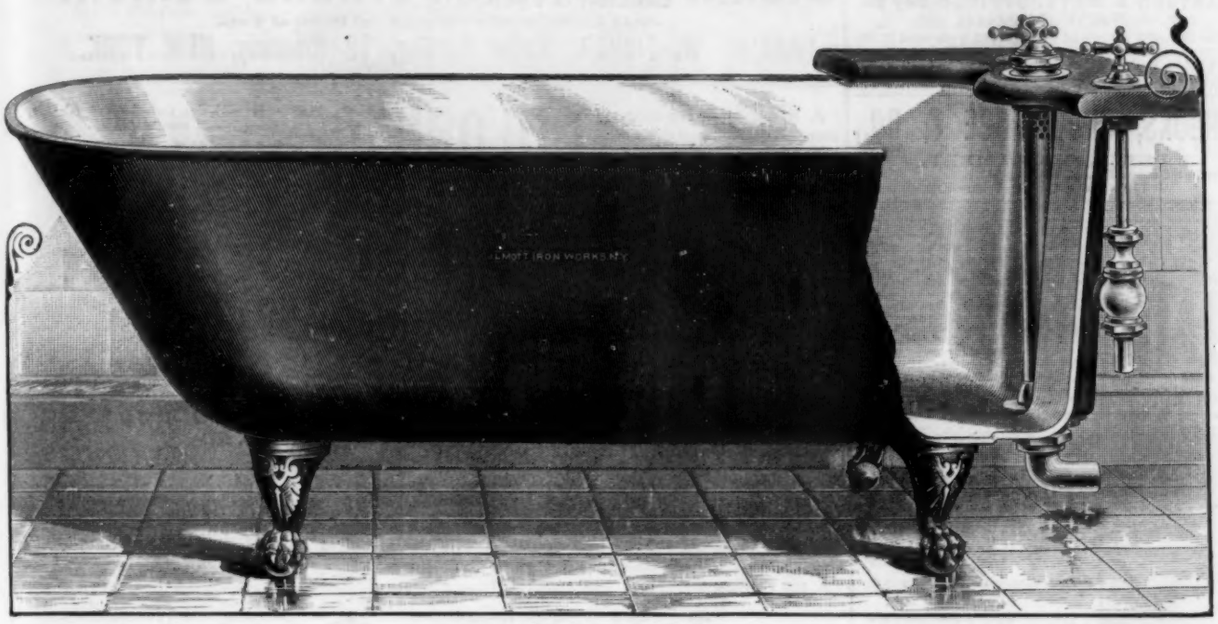

PLATE 819—G.

Porcelain-lined Recessed French Bath, with Supply Fittings and "Nonpareil" Waste.

To those who prefer a Standing Waste in the Bath, the "Nonpareil" should commend itself in every way. It is simple, cleanly, durable and handsome to look at—in short, whatever is meritorious in this form of waste, we claim for the "Nonpareil." The illustration shows the Stand-pipe seated. To empty the Bath, the Stand-pipe is raised and given a slight turn to the right or left; a further turn will permit the Stand-pipe to be taken out and cleaned. In the above Bath the water enters near the bottom, without noise or steam.

It will not fade. Send for sample and testimonials.
FRANK E. MORSE,
SOLE N. Y. AGENT,
7 Coenties Slip, New York

King's Windsor Cement
For Plastering Walls and Ceilings.

300 per cent. more TENSILE STRENGTH, 200 per cent. HARDER and requires ONE-THIRD LESS LABOR than Lime and Hair Plaster.

Houses can be occupied in from FOUR to SIX WEEKS EARLIER than those finished in the old method. Does not chip, pit, or crack. Any mechanic who understands his trade can apply it. Endorsed and used by N. Y. C. & H. R. R. R., and by users of Building Materials in various sections of the country.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.: —

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes **INSIDE WORK,** Requiring extreme durability, use No. 2 ELASTICA FINISH.

For **OUTSIDE WORK,** Requiring extreme durability, use No. 1 ELASTICA FINISH.

AUSTIN'S CORRUGATED

EXPANDING CONDUCTOR,

OR LEADER.

The ONLY ORIGINAL EXPANDING CONDUCTOR in the market, has been used for years and THOROUGHLY TESTED in all the PRINCIPAL CITIES and TOWNS in the UNITED STATES and is SPECIFIED by ARCHITECTS generally THROUGHOUT THE COUNTRY.

AUSTIN, OBDYKE & CO.,
Sole Manufacturers. PHILADELPHIA.

MAIN OFFICE:
1705 Chestnut Street, Philadelphia, Pa.

For sale by all Jobbers and Dealers in Tinners' Supplies throughout the country.

Correspondence Solicited, and Lowest Prices Guaranteed.

THE ONLY REAL
EXPANDING CONDUCTOR.
THE IRWIN & REBER
PATENT
EXPANDING WATER CONDUCTOR.
MANUFACTURED BY THE
S. S. S. Conductor Co.
LIMITED,
163 Lacock Street,
ALLEGHENY, PA.

THE STANDING SEAM allows of an easy and secure fastening, keeping the pipe far enough from the wall to make any overflow from the eave pipe or head, run down the spout, and not the wall; and will open, in case of freezing, so as to prevent bursting, and still remain double-locked and water-tight.

Made in 6-foot lengths, in a single sheet of
SOFT STEEL,
Either Galvanized, Kalameined or Leaded.
AGENTS FOR NEW ENGLAND STATES.
E. B. BADGER & SON.
Coppersmiths & Galvanized Iron Workers.
Nos. 63 & 65 Pitts St.,
BOSTON, MASS.

Best Conductor of all.
RITCHIE'S
Corrugated Expanding
Conductor.

Guaranteed no Infringement.

This pipe has all the advantages of other corrugated conductors in not bursting from freezing, and in addition:

It has no soldered joints.

The enlarged coupling makes the conductor of even size inside throughout.

It is galvanized, after formation, great care being taken to secure a smooth coating of zinc free from dross and impurities.

MANUFACTURED BY
LAMB & RITCHIE,
Boston Spiral Tube Works,
CAMBRIDGEPORT, MASS.

King's Windsor Cement

For Plastering Walls and Ceilings.

300 per cent. more TENSILE STRENGTH, 200 per cent. HARDER and requires ONE-THIRD LESS LABOR than Lime and Hair Plaster.

Houses can be occupied in from FOUR to SIX WEEKS EARLIER than those finished in the old method. Does not chip, pit, or crack. Any mechanic who understands his trade can apply it. Endorsed and used by N. Y. C. & H. R. R. R., and by users of Building Materials in various sections of the country.

For further particulars, apply to or address,

J. B. KING & CO.,

Patentees and Sole Manufacturers,

24 State Street, - - - - - - - NEW YORK.

NATURAL WOOD FINISHING.

FOR FINISHING THE INTERIOR WOOD-WORK OF YOUR HOUSE USE THE CELEBRATED AND ONLY GENUINE

"BERRY BROTHERS'"

"HARD OIL FINISH."

This article has been in general use for the past fifteen years, and is acknowledged the standard for house-finishing. It preserves the natural color of the wood and increases the beauty of the grain.

As its great success has brought out imitations, be sure that our brand or label is on every package.

We will furnish samples of finished wood on application.

BERRY BROTHERS Varnish Manufacturers, Detroit, Mich.

FOR OUTSIDE DOORS AND OTHER EXPOSED WORK USE

"BERRY BROTHERS' ELASTIC OUTSIDE FINISH."

Asbestos Flooring Felt.

Patented Aug. 20, 1872, for

FIREPROOFING.

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can *"press the button,"—we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

Include them in your Specifications.

THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)

The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.

Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.

MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.

The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vanderbilt and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

(IN NEW YORK AND WASHINGTON).

Contractors for Heating and Ventilating Residences and Public Buildings.
Manufacturers of STEAM HEATING BOILERS

509 11th St., N. W., Washington, D. C. **114 Leonard St., New York.**

Wm. T. Lindeman & Co., PHILA., PA. 1400 Frankford Ave. **Lindeman Liquid Filler** Somers, Lindeman & Co., NEW YORK, 281 Pearl Street.

The only Liquid Wood Filler on the market by which a perfectly smooth and non-absorbing surface for varnishing can be obtained without the labor and expense of rubbing off.

NO WASTE. NO CLEANING OFF. NO SETTLING.

NOTE.—Our Liquid Filler does not settle; is as transparent as a varnish; it readily combines with any of the pigment stains; is especially adapted to the use of the House Painter.

Are You Building or Remodelling?

SPURR'S NATURAL WOOD VENEERS.

—

SPURR'S PATENT WOOD CARVINGS.

WE can give your new house an elegant hardwood finish at moderate cost with our VENEERS—lasting and beautiful. In remodelling your old home, do not tear out your painted woodwork. Let us transform it into a hardwood finish with our VENEERS.

OUR patent Wood Carvings are used by many architects in connection with solid woodwork. Can be had in a large variety of designs, and are indistinguishable from hand-carving.

WORKMEN SENT ANYWHERE.

Views of interiors finished by us, with descriptive circulars, sent upon application.

Brown's Pat. Seamless Drawn Copper House Boilers.

These boilers are made of two seamless drawn copper shells, heads and sides being in one solid piece without seam, they are joined in the centre by a patented device which consists of a three-inch slip-joint well soldered and further strengthened by an outer band, all being well sweated together—a patented spiral reinforce supporting the entire interior prevents the possibility of collapse, they are thoroughly and carefully tinned inside—the ordinary boiler is tested to 200 pounds and the extra heavy boiler to 300 pounds per square inch—they are the handsomest and best in the market.

MANUFACTURED SOLELY BY

POTSDAM
RED SANDSTONE
AS A BUILDING MATERIAL.

This Stone is of the utmost strength and firmness of texture, and as strong and capable of withstanding crushing strains as any Granite. It is regarded by experts as the best known building material, being unaffected by time or weather, and absolutely fireproof. It has been used in the construction of Columbia College buildings, New York; Dominion Parliament buildings, Ottawa; Protestant Episcopal Cathedral, Albany; New York State Asylum, and the City Opera House, Ogdensburg, and many public and private buildings in New York, New England and elsewhere. In color it is an ideal shade of red, deep, rich and brilliant, and retains its freshness unimpaired by any condition or climate or situation.

If requested the company will send samples cut and dressed to architects. Estimates for stone in the rough or dressed ready for laying.

For full descriptive circular sent FREE, address the

N St., Nos. 113-115, Ward 14, 2 three-st'y brick dwells., flat roofs, 21′ x 50′; owner and builder, S. H. L. Pierce.

Norfolk St., No. 229, *rear*, Ward 24, frame dwell., 25′ x 35′; owner, E. W. Haines.

Dell St., near Ashmont Pl., Ward 24, frame dwell., 24′ x 36′; owner, I. Stewart; builder, D. Gutrow.

A SUGGESTION.

ARCHITECTS AND BUILDERS

Don't specify simply old style tin when wanting the ***best that can be made.*** Have the specifications read as follows: "The Genuine Taylor 'Old Style' **Brand** Roofing Tin, guaranteed by N. & G. Taylor Co., Philadelphia; every sheet stamped with brand, thickness, trade mark, and their name." ***This Tin*** properly put on and taken care of will last as long as the building.

N. & G. TAYLOR CO.,

Originators of Guaranteed and Stamped Roofing Tin.

PAINTING.

PAINT is an important adjunct of Architecture, and, when properly applied, accentuates the work of the Architect. It is also important as a preservative of the materials of which buildings are constructed. Three things are required of a paint adapted to these purposes: 1. It must be rich and appropriate in colors, and the colors must be selected with reference to harmonious relationship. 2. The paint must be a durable linseed oil paint. 3. It must be properly applied.

THE SHERWIN-WILLIAMS PAINT is a good linseed oil paint, uniform in color and consistency, of great covering power, and very durable. It is made in one of the best equipped manufactories in the world, under the supervision of experts in color and chemical science, and is fully guaranteed by the manufacturers. It has the voluntary endorsement of many of the best architects and master painters. It is better and more economical to use than white lead and oil, or any other prepared paint, though other paints may be sold at a less price per gallon; it being so much superior in covering power and durability.

ARCHITECTS, who aim to specify the best materials for the structures they design, who are open to conviction as to the claims of those who manufacture or supply material used in buildings, are invited to investigate the merits of THE SHERWIN-WILLIAMS PAINT, and to subject it to any reasonable professional test that other similar articles are judged by. All will find, as many have already found, that it is worthy to be included in their specifications for painting. They will find, also, that the manufacturers of this paint are desirous, so far as the use of paint is concerned, to enhance the artistic beauty of the buildings of our country, making them creditable, not only to the communities in which they are erected, but to the Architects who design them.

and 311 and 313 WABASH AVE., CHICAGO, ILL.

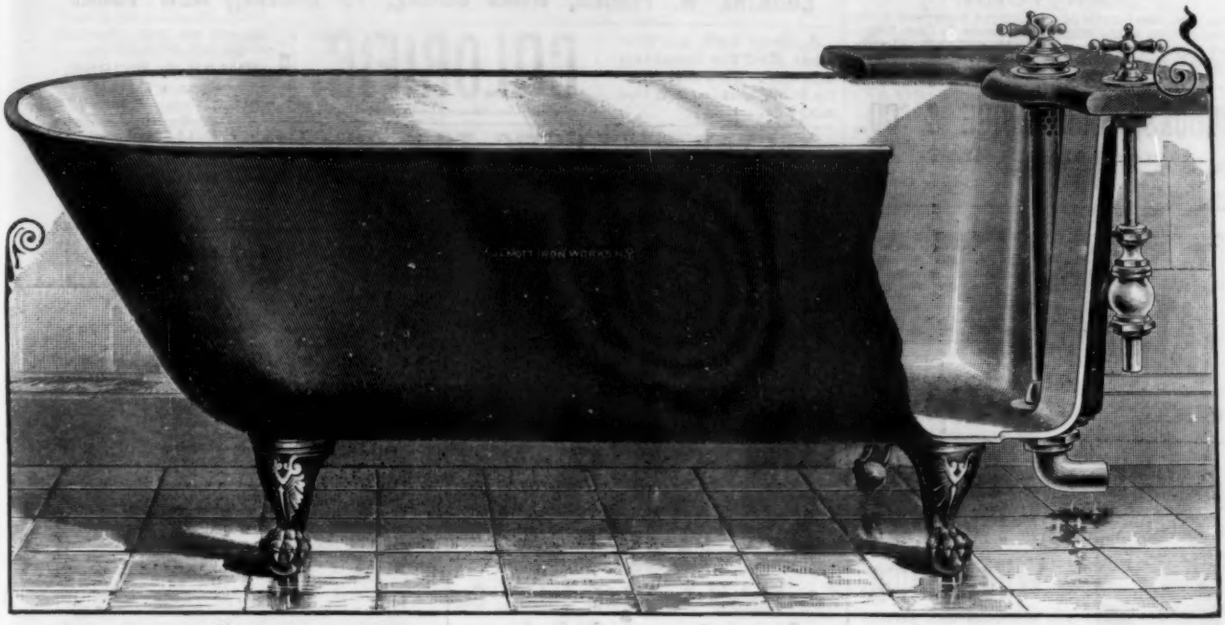

PLATE 819—G.

Porcelain-lined Recessed French Bath, with Supply Fittings and "Nonpareil" Waste.

To those who prefer a Standing Waste in the Bath, the "Nonpareil" should commend itself in every way. It is simple, cleanly, durable and handsome to look at—in short, whatever is meritorious in this form of waste, we claim for the "Nonpareil." The illustration shows the Stand-pipe seated. To empty the Bath, the Stand-pipe is raised and given a slight turn to the right or left; a further turn will permit the Stand-pipe to be taken out and cleaned. In the above Bath the water enters near the bottom, without noise or steam.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

The KODAK

Price, $25.00.

ANYBODY can use the KODAK. The operation of making a picture consists simply of pressing a button. One Hundred Instantaneous pictures are made without re-loading. No dark room or chemicals are necessary. A division of labor is offered, whereby all the work of finishing the pictures is done at the factory, where the camera can be sent to be re-loaded. The operator need not learn anything about photography. He can "*press the button,*"—*we do the rest.*

Send for copy of KODAK PRIMER, with sample photograph.

The Eastman Dry Plate and Film Co.,
ROCHESTER, N. Y.

Include them in your Specifications.
THE DETACHABLE EMPIRE SASH CORD FASTENER.
(Patent Applied for.)
The simplest and best method of attaching Sash Cords to Window Sashes ever invented, and a great saving in time and patience in putting in and taking out Window Sashes.

The most useful invention for Window Sashes ever put on the market. Every window requires them.
Reasons why you should use them: It cost less than one and one-half cents per Sash; requires no nails or screws; can be put up in or taken out in less than one minute; prevents the knot from fraying out and getting between the sash and frame; does not split the sash like nails or screws; prevents the cord from running back into the weight pocket. Manufact'd by the EMPIRE PORTABLE FORGE CO., Cohoes, N. Y., U. S. A.

Giant Metal Sash Chain.
MADE ONLY BY
THE SMITH & EGGE MANUFACTURING CO.,
BRIDGEPORT, CONN.
The most reliable and economical article in the market for the purpose. GREAT TENSILE STRENGTH. Does not corrode; does not lose its vitality by continuous use, or exposure to the elements; runs over any pulley, and gives satisfaction wherever it is used. Fixtures made of steel wire, is very simple and easily applied. Prices very low. Samples sent to any architect in the United States, free, on application. Now in use in State House, Hartford; Providence City Hall; Singer Building, Chicago; J. C. Flood's, Menlo Park, Cal.; Vancornlear and Florence Flats, New York; Boreel Building, New York; new State, War and Navy Departments, and Patent Office, Washington, D. C., *Herald* Building, Boston, and very many other fine buildings in all parts of the United States.

DRAWING AND G. S. WOOLMAN, 116 Fulton St., New York. **INSTRUMENTS MATERIALS.**

NOTICE!
We desire to notify purchasers of Steam-Pumps that numerous cheap imitations of Worthington Pumps are being manufactured. It is usually represented that they are made by us or from our patterns, and being apparently close copies, they readily deceive those who are not familiar with our machines. By this method some of them have been introduced and as their construction is invariably of inferior quality the unsuspecting buyer is imposed upon and suffers correspondingly.
We therefore call special attention to the existence of these imitations and to the fact that our machinery is conspicuously marked with our trade name, the use of which by any other manufacturer is unauthorized and illegal.
HENRY R. WORTHINGTON.

Welded Chrome Steel and Iron. (5 ply).

(Established 1852.)
Fulton St., cor. William, New York.

Pure Ready-Mixed Paints

We desire to call attention of consumers to the fact that we guarantee our ready-mixed paints to be made only of pure linseed oil and the most permanent pigments. They are not "Chemical," "Rubber," "Patent," or "Fire-proof." We use no secret or patent method in manufacturing them by which benzine and water are made to serve the purpose of pure linseed-oil.

Sample cards, containing fifty desirable shades sent on application.

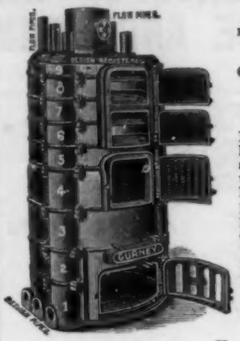
HOT WATER HEATER.



More extensively used and with better results than any other Hot Water Heater.

OFFICE OF SHERMAN & JENNE, *Ins. and R. E. Agents.*

BRATTLEBORO, VT., March 7, 1889.

"I have now been using the Gurney Hot Water Heater for several months. I have been able to secure very uniform and sufficient heat for 8 rooms and large upper and lower halls in my dwelling house, and am very much pleased with its performance. You have been very prompt, courteous and generous in your dealings with me, and I have no doubt you treat all customers in the same manner. With your heater and proper piping and radiators almost any desired results may be procured and I consider the plan of heating very effective and economical."

Signed, L. H. SHERMAN.

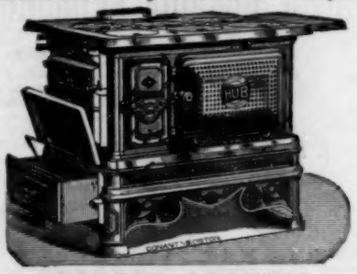
THE BEST PREPARATION FOR HOUSEKEEPING IS A

WIRE GAUZE DOOR

As used Exclusively in the New Hub Range.



PERFECT COOKING

Is the most important item in the domestic economy. By using the Wire Gauze Oven Door with the new Hub Range, the skill of the cook is supplemented by the most perfect cooking apparatus ever made.

Three of the Hub Ranges with Wire Gauze Oven Doors are in constant use at the famous Boston Cooking-School, and are endorsed by them as being better than all others. Insist on your dealer giving you the new Hub Range. It is the very highest grade of cooking apparatus made, and when quality is considered is the lowest in price of any in the market. Over 100,000 Hub Ranges in use. The Hub line of goods are world renowned, and are sold by dealers everywhere. Special circulars sent on application.

Decennial Index of Illustrations

IN THE

American Architect and Building News.

1876 to 1885. 1 vol. 8vo. . . . $2.00

A carefully-made topical index to the thousands of illustrations printed in "The American Architects" for the past ten years, with the architects and costs of the buildings illustrated. These include Sketches, Etchings, General Views; Towers and Spires; Monuments, Statues, and Tombs; Interiors and Furniture; Entrances and Gateways; Educational, Mercantile, and Public Buildings; Churches and Parish-buildings; Dwellings; Club-Houses; Theatres, Stables, and Farm-Buildings; Hotels, Museums, Libraries, and Town-Halls.

TICKNOR & CO. 211 Tremont St., Boston.

MONOGRAPHS OF AMERICAN ARCHITECTURE.

This series was designed with a view to illustrating the most notable, imposing, and interesting of our American public and semi-public buildings, with adequate groups of large and attractive pictures, carefully printed on plate paper, and with their absolute accuracy ensured by the use of the photographic process. The edifices thus illustrated are among the most conspicuous on the continent, by reason of their great size, or architectural value; and a careful study of their proportions will be of interest to all architects and students of the fine arts. The copious array of details given adds to the practical working and studying availability of the Monographs; while the beauty of the pictures as works of art should ensure them a place in all libraries where art works are sought and cherished.

NO I. HARVARD LAW SCHOOL.

H. H. Richardson, Architect. 18 plates, 13x16 (Gelatine, from nature). In portfolio. $5.00.

List of Plates.

Austin Hall, Harvard Law School. Brown's Pat. Seamless Drawn Copper House Boilers.

These boilers are made of two seamless drawn copper shells, heads and sides being in one solid piece without seam, they are joined in the centre by a patented device which consists of a three-inch slip-joint well soldered and further strengthened by an outer band, all being well sweated together — a patented spiral reinforce supporting the entire interior prevents the possibility of collapse, they are thoroughly and carefully tinned inside — the ordinary boiler is tested to 200 pounds and the extra heavy boiler to 300 pounds per square inch — they are the handsomest and best in the market.

ARCHITECTURAL BOOKS.

Sold at Bookstores. Sent, postpaid on receipt of Price by

TICKNOR & COMPANY, BOSTON, MASS.

SAFE BUILDING.

By Louis De Coppet Berg. Vol. I. Square 8vo. Illustrated. $5.00.

"The author proposes to furnish to any earnest student the opportunity to acquire, so far as books will teach, the knowledge necessary to erect *safely* any building. First comes an introductory chapter on the Strength of Materials. This chapter gives the value of, and explains briefly, the different terms used, such as stress, strain, factor of safety, centre of gravity, neutral axis, moment of inertia, etc. There follow a series of chapters, each dealing with some part of a building, giving practical advice and numerous calculations of strength; for instance, chapters on foundations, walls and piers, columns, beams, roof and other trusses, spires, masonry, girders, inverted and floor arches, sidewalks, stairs, chimneys, etc."

ANCIENT AND MODERN LIGHT-HOUSES.

By Major D. P. Heap. 1 vol. Square 8vo. Fully illustrated. $5.00.

Ancient Light-Houses — Eddystone — Bell Rock — Skerryvore — Other Lighthouses with Submarine Foundations — Minot's Ledge — Spectacle Reef — Tillamook Rock — Northwest Seal Rock — Light houses of the Atlantic Coast of the United States — Rothersand Light Tower — Fourteen-Foot Bank Light House, Delaware Bay — Skeleton Iron Light-Houses — Characteristics of Light-Houses — Isle of May Light-House — Miscellaneous Lights — Light-House Administration.

BUILDING SUPERINTENDENCE.

A MANUAL: For young Architects, Students and others interested in Building Operations as carried on at the present time. By T. M. Clark, Fellow of the American Institute of Architects. 1 vol. 8vo. 336 pages. Illustrated with 194 Plans, Diagrams, etc. Price, $3.00.

Tihs volume has been used for years as a text-book in the chief Architecturl Schools of the United States.

HOMES AND ALL ABOUT THEM.

By E. C. Gardner. 716 pages. Illustrated. $2.50.

Invaluable instructions and suggestions as to interior decoration, exterior finish, and varied forms of architecture.

MURAL PAINTING. By Frederic Crowninshield. 1 vol. Square 8vo. With numerous full-page illustrations. $3.00.

HOUSEHOLD SANITATION. By William E. Hoyt. 16mo. 30 cents. Paper covers, 15 cents.

LECTURES ON THE PRINCIPLES OF HOUSE-DRAINAGE. By J. Pickering Putnam. With Plates and Diagrams. 16mo. 75 cents.

MODERN PERSPECTIVE.

A Treatise upon the Principles and Practice of Plane and Cylindrical Perspective, by William R. Ware, Professor of Architecture in the School of Mines, Columbia College. 1 vol. 12mo. 321 pages, with 27 plates in a portfolio. $5.00.

This is by far the most exhaustive of modern works on the subjects relating to perspective, plane and panoramic, and will be of great value to all architects and artists, and others interested in the problems of art. The scientific and pictorial aspects of these investigations are carefully and thoroughly considered, both independently and in their connection with drawing; and the propositions of the author are illustrated by plates of architectural objects and perspective plans. An invaluable book for artists, architects, draughtsmen, and civil engineers.

SKETCHES ABROAD.

By J. A. Schweinfurth, Architect. This contains 30 plates, reproduced in *fac simile* from the author's sketches in pen, pencil, and water colors, by the most approved processes, and printed on 15 x 20 heavy plate paper, in specially designed portfolio. The edition is limited to 250 copies for sale, each of which is numbered. Price, $15.00 per set.

ESTIMATES FURNISHED ON APPLICATION

HELIOTYPE PRINTING CO.

Are you aware

THAT The old standard weights of Roofing Plates were 112 lbs. per box IC 14 x 20, and 224 lbs. per box IC 20 x 28 — 112 sheets per box?

Are you aware

THAT Severe competition and a desire for low-priced plates caused those weights to fall to 108 and 216 lbs., respectively?

Are you aware

THAT Most of the so-called extra coated Roofing Plates to-day do not weigh over 110 lbs. per box IC 14 x 20, and 220 lbs. per box IC 20 x 28?

Are you aware

THAT It is nevertheless claimed for many of these brands that they carry 20 lbs. of coating per box of 14 x 20, and 40 lbs. per box of 20 x 28?

Are you aware

THAT The claim by some that certain Brands of Roofing Plates carry 20 lbs. of coating is entirely disproved by the fact that such plates do not weigh over 110 lbs. per box IC 14 x 20, while the standard weight for ordinary Roofing Plates is 108 lbs. for same size and guage?

Are you aware

THAT We guarantee the "GILBERTSON'S OLD METHOD" Extra Coated Roofing Plates to average not less than 120 lbs. net per box IC 14 x 20, and 240 lbs. per box IC 20 x 28?

Are you aware

THAT We guarantee the coating to be from 18 to 20 lbs. per box for the 14 x 20, and 36 to 40 lbs. per box for 20 x 28?

Are you aware

THAT The above facts show the impossibility of placing the "GILBERTSON'S OLD METHOD" on the same level as other old style plates, either as regards price or quality?

TO ARCHITECTS AND CONTRACTORS:

We desire to call your attention to the Superior quality of Plate Glass manufactured by the

PITTSBURGH PLATE GLASS CO.

The Largest Plates of Glass in buildings in the cities of Chicago, Cleveland, Detroit, St. Paul, Syracuse, Pittsburgh, Philadelphia, Baltimore, and many New York buildings, were manufactured by our Company.

The only fuel used throughout both our works is **Natural Gas**; which, owing to its superior heating power and cleanliness, enables us to produce an article which **cannot be surpassed**, besides glass melted and annealed by our process with this gas, is far more durable and not so liable to break.

We make a specialty of three-sixteenths thickness for fine residences, also extra large sizes, wide and long plates for store fronts, beveled and obscured plates, skylight and floor glass.

With a capacity of 260,000 square feet monthly, we are prepared to execute all orders promptly, and invite correspondence.

Discourses on Architecture.

By Eugene Emanuel Viollet-Le-Duc. 2 vols. 8vo. Richly and copiously illustrated, with 37 steel plates and over 200 wood-cuts, many of which are full-page. $15.00. A new edition of this noble classic of architecture and æsthetics.

"While it will be greatly prized by professional architects in the United States, its literary merits are of such a high order as to commend it to all persons of taste and culture. We can do but the faintest justice to its philosophical depth, historical research, professional ability, critical taste and bright originality." — *Chicago Inter-Ocean.*

"It discusses the grounds and history of architecture as an art, with copious illustrations of the various schools and methods of architecture, and is written in a noble and agreeable manner — less piquant than that of Ruskin, but also less fantastic and more practical." — *Springfield Republican.*

"For anybody who really cares to know about architecture, these 'Discourses' may confidently be recommended as forming the best help he can get in English." — *New-York World.*

"We have no hesitation in saying, deliberately, and without qualification, that no work of anything like equal value to American architects has ever been published in this country — none from the study of which they and all lovers of art may derive so many, so durable and so important lessons for the elevation and perfection of their art." — *New-York Christian Intelligencer.*

TICKNOR & CO., Boston.

Home Sanitation,

A Manual for Housekeepers, by the Sanitary Science Club of the Association of Collegiate Alumnæ. Edited by Ellen H. Richards and Marion Talbot. Cloth. . . . . 50 cents.

THE object of this manual is to arouse the interest of housekeepers in the sanitary condition of their homes, and to indicate the points requiring investigation, the methods of examination, and the practical remedies. The subjects treated are the Situation of the House, care of the Cellar, Plumbing and Drainage, Ventilation, Heating, Lighting, Furnishing, Clothing, Food, and Drink. Each topic is introduced by an explanatory statement, which is followed by a series of questions so framed that an affirmative answer implies a satisfactory arrangement; and they also suggest a remedy if the answer is negative.

PROPOSALS.

ROOFING.
[At Boston, Mass.]

The commissioners for the erection of a new Court-house for Suffolk County invite sealed proposals **until Saturday, July 6, 1889, at 12 o'clock** M., for furnishing the roofing of the main building.

Bidders will give separate prices for the carpenters' work and the copper-work.

The carpenters' work includes a temporary truss roof for covering in the central portion of the building.

The copper-work to be laid comprises about 40,000 square feet, together with the necessary gutters and conductors.

Plans and specifications can be examined at the architect's office on and after Thursday, June 27.

The right to reject any or all proposals reserved.

S. B. STEBBINS,
THOMAS J. WHIDDEN, } Commissioners.
GODFREY MORSE,

705

FURNITURE.
[At Washington, D. C.]

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
WASHINGTON, D. C., June 12, 1889.

Sealed proposals will be received at this department **until 2 o'clock** P. M., **Wednesday, July 17, 1889,** for manufacturing and placing in position in complete working order in the United States buildings hereinafter named certain articles of standard and special furniture.

Specifications, drawings and blank forms of proposals will be furnished upon application.

The department reserves the right to reject any and all bids and to waive defects.

Partial bids for any one of the buildings named will not be considered.

Proposals should be addressed to the Secretary of the Treasury, and indorsed "Proposals for Standard and Special Furniture for United States Court-house, Augusta, Me.," etc., viz.: Augusta, Me.; Baltimore, Md.; Keokuk, Iowa; Minneapolis, Minn.; Reading, Pa.; Santa Fe, N. M.; Fort Scott, Kan.; Springfield, Ohio; Harrisonburg, Va.; Des Moines, Iowa; Macon, Ga.

GEO. S. BATCHELLER,
705 Acting Secretary.

STAND-PIPE, ETC.
[Near Newport, Ky.]

NEWPORT, KY., June 15, 1889.

Sealed proposals, in triplicate, subject to the usual conditions, will be received at the office of assistant quartermaster, U. S. Army, at new post near Newport, Ky., **until 11** A. M. **Monday, July 15, 1889,** and then opened, for construction of a stand-pipe, tower, and piping the grounds for the water-supply system at the new post, near Newport, Ky.

The United States reserves the right to reject any or all bids or parts thereof.

All information furnished on application to this office.

Envelopes containing proposals should be marked "Proposals for Stand-pipe, etc.," and addressed to

A. H. YOUNG,
Captain and Assistant Quartermaster, U. S. Army.

Sanitary Appliances

THE SANTÉ

Gas and Back-Water Trap or Safety Valve.

PORCELAIN-LINED RECESSED FRENCH BATH,

With Supply Fittings and "Nonpareil" Waste.

To those who prefer a Standing Waste in the Bath, the "Nonpareil" should commend itself in every way. It is simple, cleanly, durable and handsome to look at — in short, whatever is meritorious in this form of waste, we claim for the "Nonpareil." The illustration shows the Stand-pipe seated. To empty the Bath, the Stand-pipe is raised and given a slight turn to the right or left; a further turn will permit the Stand-pipe to be taken out and cleaned. In the above Bath the water enters near the bottom, without noise or steam.

Warner's Steam Water Filter.

VERY little progress has heretofore been made in the construction of Filters for purifying water for Steam Boilers on a large scale. In this direction we have accomplished what has never been done before. Warner's Filter will free water from all organic matter arising from the presence of animal or vegetable matter. It will free the water *from all lime and combinations of lime, such as constitute "hard" water.* The water passes off into the boilers as pure as if condensed from steam or vapor under the most favorable circumstance. It saves 45 per cent of fuel, as computed by French engineers. The use of this Filter will double the length of the life of a boiler.

The water passing through this Filter may be used not only for all mechanical purposes, but for medicinal purposes as well, the same as water filtered or distilled by druggists.

For Pamphlets and other information address

THE STEAM WATER FILTER CO., Limited,

IMPORTANT

To Architects, Builders, House-Painters, Decorators, Boat-Builders and Yachtsmen, desiring an EXTREMELY DURABLE Finish for wood.

Are superior to any Varnishes or Wood-Finishes in the market, for the following reasons, viz.:—

They possess more body, higher lustre, greater resisting properties to atmospheric influences, action of water & alkali, are more elastic, will not scratch or mar white, and are more durable.

ROSENBERG'S TRADE ELASTICA MARK REGISTERED FINISHES NO. 1 & NO. 2.

For all classes
INSIDE WORK,
Requiring extreme durability, use No. 2
ELASTICA FINISH.

For
OUTSIDE WORK,
Requiring extreme durability, use No. 1
ELASTICA FINISH
